Simplified Signs presents a system of manual sign communication intended for special populations who have had limited success mastering spoken or full sign languages. It is the culmination of over twenty years of research and development by the authors. The Simplified Sign System has been developed and tested for ease of sign comprehension, memorization, and formation by limiting the complexity of the motor skills required to form each sign, and by ensuring that each sign visually resembles the meaning it conveys. Volume 1 outlines the research underpinning and informing the project, and places the Simplified Sign System in a wider

context of sign usage, historically and by different populations. Volume 2 presents the lexicon of signs, totalling approximately 1000 signs, each with a clear illustration and a written description of how the sign is formed, as well as a memory aid that connects the sign visually to the meaning that it conveys. While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities, cerebral palsy, autism, or aphasia, it may also assist the communication needs of a wider audience - such as healthcare professionals, aid workers, military personnel, travellers or parents, and children who have not yet mastered spoken language. The system also has been shown to enhance learning for individuals studying a foreign language. Lucid and comprehensive, this work constitutes a valuable resource that will enhance the communicative interactions of many different people, and will be of great interest to researchers and educators alike.

This book is a study of three iatrosafia (the notebooks of traditional healers) from the Ottoman and modern periods of Greece. The main text is a collection of the medical recipes of the monk Gymnasios Lauri?tis (b. 1858). Gymnasios had a working knowledge of over 2,000 plants and their use in medical treatments. Two earlier iatrosafia are used for parallels for Gymnasios's recipes. One was written c. 1800 by a practical doctor near Khania, Crete, and illustrated by a second hand. The second iatrosafion dates to the sixteenth century; ascribed to a Meletios, the text survives in the Codex Vindobonensis gr. med. 53. The contents of these and other iatrosafia are predominantly medical, with many of the remedies taken from folk medicine, classical and Hellenistic pharmacological writers, and Galen. The book opens with a biography of the monk Gymnasios and his recipes and then a description of the Cretan and Meletios iatrosafia. The

iatrosophia, their role in Greek medical history, and the methods of healing are the subject of chapter 2. The Greek text of Gymnasios's recipes are accompanied by a facing English translation. A commentary offers for each of Gymnasios's recipes passages (translated into English) from the two other iatrosophia to serve as parallels, as well as an analysis of the pharmacopoeia in the medical texts. The book concludes with Greek and English indices of the material medica (plants, mineral, and animal substances) and the diseases, and then a general index.
