Providing your wheels with the force they need to roll where you want them to are Acura axles. The axles also keep your vehicle's wheels properly aligned to one another and to the body of the vehicle while carrying the weight of your luxury car or SUV. If you notice vibrations when driving or loud ticking noises while turning, it may be time to have your Acura's axles checked out by a mechanic.

It is the drive spleen on which the axle mounts then they are pretty easy to change. You will find a bearing and a seal in there. Just remove the axle, pop the spline cover and change the seal. Seal leakage is common due to seal wear and tear. Although a good seal will leak aswell if you overfill the transmission with oil.
