This book reports on the findings from a research study of vocational and higher education graduates' employability challenges. The nature and extent of these challenges, their underlying causes, and effective strategies to address the problems in this area are all analysed from a multiple-stakeholder paradigm. The primary focus of the book is on governments; secondary, vocational, and higher education systems; and industry employers - rather than graduates themselves - in order to highlight the policy and strategy implications for governments, industry and educational systems. Readers will acquire comprehensive information on the nature and extent of graduate employability in terms of country-specific challenges, together with a deeper understanding of their complex causes, and the inter-relatedness between governments, educational systems, industry sectors, and potential employers. They will also be provided with a broad range of stakeholder strategies designed to effectively address these challenges within integrated national and regional approaches.

This book reports on practical approaches for facilitating the process of achieving excellence in the management and leadership of organizational resources. It shows how the principles of creating shared value can be applied to ensure faster learning, training, business development, and social renewal. In particular, the book presents novel methods and tools for tackling the complexity of management and learning in both business organizations and society. It covers ontologies, intelligent management systems, methods for creating knowledge and value added. It gives novel insights into time management and operations optimization, as well as advanced methods for evaluating customers' satisfaction and conscious experience. Based on two conferences, the AHFE 2017 International Conference on Human Factors, Business Management and Society and the AHFE 2017 International Conference on Human Factors in Management and Leadership, held on July 17-21, 2017, in Los Angeles, California, USA, the book provides both researchers and professionals with new tools and inspiring ideas for achieving excellence in various business activities.

An international and cross-industry account of Global Talent Management, giving readers an overview of individuals as global talent, organisations as hubs for global talent, and the relationship of global talent with policy, society and economies. By approaching this subject from a truly international perspective – with international case studies and practical insights from global employers - students are encouraged to think of themselves as 'global talent'. This book aims to support students in developing the right skills, competencies and attributes needed to succeed in the highly competitive, and constantly evolving, global labour market. Following on from the self-reflective section, the book then provides an overview of an organisation's position in global talent development. With a discussion on current organisational approaches in the corporate and public sectors, and how organisations should position themselves in relation to attraction, development and retention of global talent. The book also provides a critical insight into how global talent is affected by policy, society and the economy. Including an overview of contemporary challenges such as the global talent mismatch, demographic disruptions, and the interplay between global talent and economic competitiveness. Essential reading for anyone studying Global Talent Management.

Data is your most valuable leadership asset—here's how to use it The Data Driven Leader presents a clear, accessible guide to solving important leadership challenges through human resources-focused and other data analytics. This engaging book shows you how to transform the HR function and overall organizational effectiveness by using data to make decisions grounded in facts vs. opinions. Identify root causes behind your company's thorniest problems and move toward a winning, future-focused business strategy. Realistic and actionable, this book tells the story of a successful sales executive who, after leading an analytics-driven turnaround (in Data Driven, this book's predecessor), faces a new turnaround challenge as chief human resources officer. Each chapter features insightful commentary and practical notes on the points the story raises, guiding you to put HR analytics into action in your organization. HR and other leaders cannot afford to overlook the power and competitive advantages of data-driven decision-making and strategies. This book reflects the growing trend of CEOs choosing analytics-minded business leaders to head HR, at a time when workplaces everywhere face game-changing forces including automation, robotics and artificial intelligence. It is urgent that human resources leaders embrace analytics, not only to remain professionally relevant but also to help their organizations successfully navigate this digital transformation. HR professionals can and must: Understand essential data science principles and corporate analytics models Identify and execute effective data analytics initiatives Boost HR and company productivity and performance with metrics that matter Shape an analytics-centric culture that generates data driven leaders Most organizations capture and report data, but data is useless without analysis that leads to action. The Data Driven Leader shows you how to use this tremendous asset to lead your organization higher.

This is an ideal reference for those looking to understand, study, and practice community engagement and outreach. It discusses the different ways individuals - including faculty, administrators, and management in organizations - engage in their communities. It supplies case studies, best practices, and theoretical approaches to the study of community engagement. Scholars active in this field can use this book as an integration of the current knowledge concerning community engagement and as an inspiration for future research agendas. Whilst directing how to implement effective community engagement practices, the book also facilitates the application of organizational theory to community engagement. It will appeal to academics who are interested in the theoretical background of community engagement.

Shows how Japan's immigration policy is shaped by the nature of Japan's economy and elite debates about the country's national identity. In Help (Not) Wanted, Michael Strausz offers an original and provocative answer to a question that has long perplexed observers of Japan: Why has Japan's immigration policy remained so restrictive, especially in light of economic, demographic, and international political forces that are pushing Japan to admit more immigrants? Drawing upon insights developed during nearly two years of intensive field research in Japan, Strausz ultimately argues that Japan's immigration policy has remained restrictive for two reasons. First, Japan's labor-intensive businesses have failed to defeat anti-immigration forces within the Japanese state, particularly those in the Ministry of Justice and the Japanese Diet. Second, no influential strain of elite thought in postwar Japan exists to support the idea that significant numbers of foreign nationals have a legitimate claim to residency and citizenship. This book is particularly timely at a moment shaped by Brexit, the election of Trump, and the rise of anti-immigrant political parties and nativist rhetoric across the globe.
