early design in the 1960s through to the latest advances in the MAX. The book provides detailed descriptions of systems, internal and external components, their locations and functions, together with pilots notes and technical specifications. It is illustrated with over 500 photographs, diagrams and schematics. Chris Brady has written this book after many years developing the highly successful and informative Boeing 737 Technical Site, known throughout the world by pilots, trainers and engineers as the most authoritative open source of information freely available about the 737.

NOW ALSO AVAILABLE AS iPad APP (continuously updated). CHECK THE APPSTORE for B737 PRH! The book (edition 2014) is NOT being

updated! This handbook explains European aircraft performance rules (EASA) for large civil twin aircraft (Class A) in general and for the Boeing 737NG in special. It contains lots of colourful pictures and operational information for the airline pilot. "An excellent book which finally simplifies and brings together aircraft performance information." "It is the best performance book I ever held in my hands. Just brilliant!" "This book makes 737 performance transparent and understandable." "A must for every 737 pilot!"

This handbook supersedes FAA-H-8261 -16, Instrument Procedures Handbook, dated 2014. It is designed as a technical reference for all pilots who operate under instrument flight rules (IFR) in the National Airspace System (NAS). It expands and updates information contained in the FAA-H-8083-15B, Instrument Flying Handbook, and introduces advanced information for IFR operations.

Instrument flight instructors, instrument pilots, and instrument students will also find this handbook a valuable resource since it is used as a reference for the Airline Transport Pilot and Instrument Knowledge Tests and for the Practical Test Standards. It also provides detailed coverage of

instrument charts and procedures including IFR takeoff, departure, en route, arrival, approach, and landing. Safety information covering relevant subjects such as runway incursion, land and hold short operations, controlled flight into terrain, and human factors issues also are included.
