When I started working for SAP two decades ago I asked this question on my first day “Where are the best practices?” Prior to joining the organization I had heard people in the industry mention that one of the strengths of SAP software was that it was based on best practices. I was excited: finally I would get

to see them. “There’s no list” answered my mentor. “It’s embedded into the processes supported by the system.” “Ah,” I said, a little disappointed. After two decades as an SAP consultant I can comfortably confirm this. However, this book is not about those types of best practices, it’s about the best practices that should be observed when implementing, upgrading, modifying, and enhancing an SAP ERP system. This book is based on my experience in the SAP consulting industry; first as an employee of the software firm, and then as a senior manager of one of the world’s largest system integrators. In it you will find the best practices specific to a successful implementation.

The book is for the SAP Accountants to gain FI module expertise. It empowers you with knowledge on master data to transaction postings and reports generation in SAP GL, AR & AP.
