With the GT5051, Altec Lansing uses dipole speakers to reduce sound dispersion and increase directivity. A dipole speaker emits sound to the front and back of the speaker and uses the phase to reduce sound emitted to the side. You may notice that the top satellite, the one for surround sound, has a grid in the back to let sound through.

In 1853, in the farthest outpost of the Czar's empire, four Scandinavian indentured servants—seven-year men no better off than slaves—resolve to escape from Russian Alaska. They steal an Indian canoe and point it south toward Astoria, in Oregon, twelve hundred miles away. This novel of audacity is based on a historical incident discovered by the author, and transformed by his imagination into a sustained sweep of adventure. The four sea runners must weather the worst the ill-named Pacific can throw at them, and must weather their own fierce squalls, too, as day upon day, guided as much by instinct and determination as by map, they paddle through the magnificent maze of the Northwest Coast toward the mouth of the Columbia River.

Jones traces the St. Nicholas legend from its origins in 4th c. Asia Minor through the Middle Ages to its form in 19th c. New York. A reprint of the 1978 original. Investigates the yearly pilgrimage and celebration at the grave of Rabbi Chayam Chouri (1885-1957), a Tunisian Jewish leader who emigrated to Israel in 1955. Weingrod (anthropology, Ben Gurion University, Beersheba, Israel) pursues historical and anthropological questions of sainthood and devotion in modern Israel. Includes photographs. Paper edition (unseen), \$10.95. Annotation copyrighted by Book News, Inc., Portland, OR.

Discipline that you and your child will feel good about! At last, a positive discipline book that is chock-full of practical tips, strategies, skills, and ideas for parents of babies through teenagers, and tells you

EXACTLY what to do “in the moment” for every type of behavior, from whining to web surfing. Parents and children today face very different challenges from those faced by the previous generation. Today’s children play not only in the sandbox down the street, but also in the World Wide Web, which is too big and complex for parents to control and supervise. As young as age four, your children can contact the world, and the world can contact them. A strong bond between you and your child is critical in order for your child to regard you as their trusted advisor. Traditional discipline methods no longer work with today’s children, and they destroy your ability to influence your increasingly vulnerable children who need you as their lifeline! Spanking and time-outs do not work. You need new discipline tools! Help your child gain: · Strong communication skills for school, career, and relationship success. · Healthy self-esteem, confidence, and greater emotional intelligence. · Assertiveness, empathy, problem-solving, and anger-management skills. · A respectful, loving connection with you! You will gain: · An end to resentment, frustration, anger, tears, and defiance in your parent-child relationship. · Tools to respectfully handle most modern challenging parenting situations, including biting, hitting, tantrums, bedtimes, picky eating, chores, homework, sibling wars, smoking, “attitude,” and video/computer games. · Help for controlling your anger “in the moment” during those trying times. · A loving, respectful, teaching and fun connection with your child! "Offers a wealth of ideas and suggestions for raising children without the use of punishment of any kind." Linda Adams, President and CEO of P.E.T. Parent Effectiveness Training and Gordon Training International "The world is in desperate need of gentle, caring discipline techniques. Judy Arnall has created a wonderful, nurturing guide that all parents can benefit from." Elizabeth Pantley, Author of The No-Cry Solution series of books. "Parents always prefer to be loving but often don't know how. Arnall's book debunks all the old beliefs about discipline through painful measures such as punishment, consequences or bribes and provides far more effective

and kind ways to raise well behaved and thriving children." Naomi Aldort, Ph.D., Author of Raising Our Children, Raising Ourselves BONUS! 50-page quick reference tool guide included

This volume examines the complex, contradictory discourses of hypertext. Using theoretical material from cultural theory, radical and border pedagogies, and technology criticism, the text discusses three primary ways hypertext is articulated: as automated book (technical communication), as virtual commodity (online databases), and as environment for constructing and exploring multiple subject positions (postmodern hypertext in composition and literature). I would recommend the entire book to researchers and academics who recognize the need to integrate new technologies into our classrooms and pedagogies. - Technical Communication

Written in a cookbook style, this book offers solutions using a recipe based approach. Each recipe contains step-by-step instructions followed by an analysis of what was done in each task and other useful information. The cookbook approach means you can dive into whatever recipes you want in no particular order. The iPhone Interface Cookbook is written from the ground up for people who are new to iOS or application interface design in general. Each chapter discusses the reasoning and design strategy behind critical interface components, as well as how to best integrate each into any iPhone or iPad application. Detailed and straight-forward recipes help give guidance and build understanding far beyond what is offered through Apple's Human Interface Guidelines.

Part of the Oxford Case Histories series, this volume includes 65 neurosurgical cases covering core topics specified in the UK Neurosurgical Training Curriculum. Cases are drawn from the following

clinical areas: trauma, vascular neurosurgery, tumours, spinal neurosurgery, hydrocephalus and paediatric neurosurgery, functional neurosurgery, and medical problems in neurosurgery. Revolving around actual patients and the relevant knowledge required in specific situations for decision making in clinical practice, this book will serve as an invaluable educational tool to help trainees, doctors, and practising neurosurgeons manage the a wide variety of clinical scenarios encountered in neurosurgery.

“The international world of states and their modern system is a literary realm,” writes Charles Hill in this powerful work on the practice of international relations. “It is where the greatest issues of the human condition are played out.” A distinguished lifelong diplomat and educator, Hill aims to revive the ancient tradition of statecraft as practiced by humane and broadly educated men and women. Through lucid and compelling discussions of classic literary works from Homer to Rushdie, *Grand Strategies* represents a merger of literature and international relations, inspired by the conviction that “a grand strategist . . . needs to be immersed in classic texts from Sun Tzu to Thucydides to George Kennan, to gain real-world experience through internships in the realms of statecraft, and to bring this learning and experience to bear on contemporary issues.” This fascinating and engaging introduction to the basic concepts of the international order not only defines what it is to build a civil society through diplomacy, justice, and lawful governance but also describes how these ideas emerge from and reflect human nature.

A LOT CAN CHANGE IN THREE MONTHS: Wars can be decided, nations can be forged . . . or entire species can be brought to the brink of annihilation. The Morningstar virus has swept the face of the planet, infecting billions. Its hosts rampage; its victims don't die, but are reborn as cannibalistic shamblers. **SCATTERED ACROSS THE WORLD, EMBATTLED GROUPS HAVE PERSEVERED.**

For some, survival is the pinnacle of achievement. Others hoard goods and weapons. And still others leverage power over the remnants of humanity with a mysterious cure. Francis Sherman and Anna Demilio want only a vaccine, but to find it they must cross a ravaged landscape of the infected and the lawless living. **THE BULK OF THE STORM HAS PASSED**, leaving echoing thunder and softly drifting ashes. But for the survivors, the peril remains, and the search for a cure is just beginning. . . . Returning to the terrifying vision of his “awesome zombie novel” (David Moody) *Plague of the Dead*, Z.A. Recht “will once again make you turn your lights on” (J.L. Bourne) with this chilling apocalyptic thriller.
