Utilized to deburr/finish irregular/ blocky shapes, since the vibrating activity works the media at blind or hidden areas passed over by the slide action of a conventional tumbler. Vibratory machines can often process more complex part configurations than tumblers and run cleaner with plastic media. Part size is not a problem in a vibratory machine.

Students can use jewelry findings to finish off the resin objects. Having a variety of findings like earring posts, necklace chains, clasps and closures will allow for many different pieces to be made. Simply attach the findings by pouring a small amount of resin and allow it to set, or use a little adhesive to lock it in place.
