science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

L.A. ' S BLACK ELITE, 80 ' S DECADENCE LUST, GREED AND GOLD To the outsider, Courtney Hamilton has the perfect life. She is the beautiful, intelligent but naive daughter of one of the most successful, black business men in Los Angeles in 1977. The family ' s fortune was handed down by her great-grandfather, who was one of California ' s first African American gold miners. Jealous of her daughter ' s privileged upbringing, and haunted by her own past, Courtney ' s mother, Danielle does everything she can to make her only daughter ' s life miserable. However, Courtney is graduating from high school and determined to gain her independence. She falls in love with Richard Thurston, a less-fortunate but ambitious waiter from South L.A., goes to college and finds a passion for filmmaking, while her mother devises a plan to ruin Courtney ' s happiness. Unfortunately, Danielle ' s insatiable desire for power, money and sex, not only affects Courtney ' s life but threatens the family fortune as well. Courtney finally sees her mother for who she really is, toughens up and starts her dream job of producing a film about African Americans and their struggles in the California gold mines-but several unexpected events prevent the film ' s premiere and Courtney faces losing everything. Will Danielle ever become a caring, loving mother and reveal the secrets of her hidden past? And, more importantly, can Courtney forgive her mother for all that she has done and move on before time runs out? “ This coming of age story captivates readers with vivid characters that live the 1980 ' s lifestyle to the fullest. From the discos and movie sets
