A standard guide which evaluates important reference materials in English studies. Describes resources published since 1992.

The fourth edition of *Literary Research Guide* adds entries describing resources published since 1997, many of which reflect the expansion of literary study into emerging fields (gay, lesbian, and transgendered studies and postcolonial theory). It also lists reliable Web sites sponsored by academic institutions and learned societies. The Guide concludes with name, title, and subject indexes.

James Harner's popular pamphlet, first published in 1985, has been revised and updated in the light of advances in computer technology and the availability of humanities databases. Harner offers useful information on planning research, organizing an annotated bibliography, compiling entries, using a computer to prepare the manuscript, and editing. While the booklet focuses on the preparation of a comprehensive bibliography on a single literary author, the procedures and techniques are easily adapted to selective or subject bibliographies and to other periods and disciplines.

With over seven hundred pages, James L. Harner's *Literary Research Guide* evaluates important bibliographies, abstracts, surveys of research, indexes, databases, catalogs, annals, dictionaries, and the like. In the new edition, Harner has added entries describing new resources and has revised nearly half the entries from the first edition. The second edition contains almost 1,200 entries; the annotations discuss an additional 1,248 books and articles and cite 745 reviews. The guide concludes with name, title, and subject indexes.An extraordinarily thorough bible of sources in English studies.... This work should be manacled to the wrist of every student entering an English Department. Year's Work in English StudiesThis work is a gold mine of information and a model of its kind. American Reference Books Annual

Evaluates reference materials in English literature, describing each work's type, scope, limitations, and uses in research, in an updated edition that includes a new section on cultural studies.

Literary Research and the American Realism and Naturalism Period: Strategies and Sources will help those interested in researching this era. Authors Linda L. Stein and Peter J. Lehu emphasize research methodology and outline the best practices for the research process, paying attention to the unique challenges inherent in conducting studies of national literature.

*This report will be useful to anyone interested in the current state of online American literature resources. Its purpose is twofold: to offer a sampling of the types of digital resources currently available or under development in support of American literature; and to identify the prevailing concerns of specialists in the field as expressed during interviews conducted between July 2004 and May 2005. Part two of the report consolidates the results of these interviews with an exploration of resources currently available. Part three examines six categories of digital work in progress: (1) quality-controlled subject gateways, (2) author studies, (3) public domain e-book collections and alternative publishing models, (4) proprietary reference resources and full-text primary source collections, (5) collections by design, and (6) teaching applications. This survey is informed by a selective review of the recent literature.~CLR Web site.

From Anglo-Saxon runes to postcolonial rap, this undergraduate textbook covers the social and historical contexts of the whole of the English literature.
