Eventually, you will completely discover a other experience and carrying out by spending more cash. still when? reach you receive that you require to get those every needs considering having significantly cash? Why don't you try to acquire something basic in the beginning? That's something that will lead you to comprehend even more in this area the globe. experience, some places, like history, amusement, and a lot more?

It is your entirely own get older to law reviewing habit. in the middle of guides you could enjoy now is **cased hole and production log evaluation hardcover** below.

Cased-hole wireline logging services enable you to reduce the risk of costly interventions and nonproductive time (NPT) while increasing production efficiency. With a breadth of services for well performance evaluation, integrity, and recovery troubleshooting, we enable a whole new level of performance for your onshore, offshore, and deepwater applications.

This course is a unique opportunity to learn proven cased hole and production log diagnostic techniques. Who Attends This course is for reservoir and production engineers and geologists, petrophysicists, log analysts and others involved in well surveillance, maximizing recovery, identifying production problems, planning workover operations or utilizing production information in reservoir studies.

Cased Hole logging, perforating, pipe recovery and production logging. Our cased hole trucks and skid units are rugged multipurpose units which can perform cased hole logging, perforating, pipe recovery and production logging services. All units are equipped with advanced surface instrumentation. TES also provides the service of wireline mast skid units with high pressure control equipment.

Interpretation techniques using modern cased hole logging tools are presented to understand, analyze, improve and resolve a variety of reservoir and near-wellbore production situations. Coverage includes formation evaluation through casing using pulsed neutron tools; technologies for evaluation of multi-phase fluid movement; cement bond logging from the traditional CBL/VDL and pad tools to ultra sophisticated rotating head pulse-echo tools; and fiber optic temperature and acoustic logging.

All over the world, customers choose READ's production logging services to better understand their wells. We have run production logging tools (PLTs) in hundreds of wells and we've acquired and analysed millions of feet of log data - giving you the peace of mind that your assets are in safe and qualified hands.
