Mr. Hiroshi Tsuyuki, the
Japanese authority on
Jewelry Wax Modeling, uses
an innovative approach to
teaching the technique of

wax modeling. Often a process is easier shown than described in so many words.

This book was conceived through the author's teaching experience -- more photos and sketches and less text resulting in less over-

the-shoulder supervision. By introducing new techniques in each project, his students were able to progress more rapidly towards independence in design concepts. While preparing a model for

book, each one designed to teach the use of certain tools and types of waxes in a progressive manner as one's skills improve. Each step of every project is accompanied by a photo and text and in some cases

supplementary sketches and notes are provided to clarify those particular processes. Paying careful attention to the photos, noting the demonstrator's hand position and the type of tool being used,

eliminates any confusion
which may result from the
text. After each basic model
is completed the author
offers a number of sketches
suggesting design
possibilities using the
techniques learned in the

construction of the basic model. Mr. Tsyuki states that by conscientiously completing each project, the student should be well on the way to becoming a designer/modeler. This book is 112 pages and has 283
