The best just got better. FitnessGram is the gold standard for assessing the health-related fitness and activity levels of youths. The Cooper Institute has updated the FitnessGram Administration Manual with new material to ensure that FitnessGram is the most comprehensive and informative program that can drive meaningful behavior change and set up children for a healthy future. The fifth edition of FitnessGram Administration Manual: The Journey to MyHealthyZone offers K-12 teachers two primary assessment resources that allow them to produce individualized reports for each student in their class. FitnessGram provides a complete battery of health-related fitness assessments that are scored using criterion-referenced Healthy Fitness Zone® standards. The standards are age and sex specific and are based on how fit children need to be for health. New to this fifth edition:

- Audio of cadences and videos and photos for test protocols, making it easier for you to administer tests
- A chapter on communicating with stakeholders (students, parents, faculty and staff, administrators, and the community)
- A chapter on data mining and using data to inform your instruction and help you make sound curricular decisions
- A design that enhances your ease in using the material and administering the tests

You will learn how to administer the tests, interpret the results, and provide feedback to your students on their results. FitnessGram Administration Manual also offers a web resource that includes video clips that demonstrate the assessments; audio for the PACER, curl-up, and push-up tests; and reproducible forms. Through FitnessGram, you can assess children's fitness in these areas:

- Aerobic capacity
- Muscle strength
- Muscular endurance
- Flexibility
- Body composition

Several test options are provided for most of those areas; one test item is recommended. As a FitnessGram user you also have access to everything the Presidential Youth Fitness Program has to offer. The Presidential Youth Fitness Program helps physical educators assess, track, and recognize youth fitness and physical activity. Through this program you are also provided with the following:

- Instructional strategies for promoting student physical activity and fitness
- Communication tools to help physical educators increase awareness about their work in the classroom
- Options for recognizing fitness and physical activity achievements

This latest version of the FitnessGram Administration Manual: The Journey to MyHealthyZone is your guide to conducting the test protocols, recording the data, interpreting the results, and sharing those results in ways that will encourage students to be physically active and adopt healthy behaviors throughout their lives.

This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the 'elephant in the room'. These authors note that 'the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road'. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the 'gap' that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open-and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where "safe spaces" or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.
