(Modules 2.4–2.6) These modules
introduce atoms. It is most important to
know what the subatomic particles are,
where they are located in an atom, and that
atoms of different elements differ because
they contain different numbers of protons.

Chemical Basis Of Life

Biochemistry or biological chemistry, is the study of chemical processes within and relating to living organisms. A sub-discipline of both biology and chemistry, biochemistry may be divided into three fields: structural biology, enzymology and metabolism. Over the last decades of the 20th century, biochemistry has become
