Write a Winning Resume - Step-by-Step
The Resume Writing Guide, (updated for 2015) will show you, step-by-step, exactly how to create a resume that makes a great impression and gives you more power in the job search process. It breaks the big, complex job of resume writing into small, completely manageable tasks, so you easily can write a resume that is tailored to show you at your best.
Learn From the Experience of 2000 Job Seekers
In this book, you'll find the kind of expertise that only comes from real experience. Lisa McGrimmon has written over 1000 resumes and helped over 2000 job seekers find work. She knows how to coach people through the process to create real resumes that give real results for real people.
Guidance Through the Process
The Resume Writing Guide takes you through the actual process of creating a resume one step at a time, carefully guiding you through each decision. It isn't just a collection of rules and tips. The process is broken into small, simple steps. In each chapter, you will complete a few tasks, and, if you complete all of the tasks to the best of your ability, once you reach the end of the book, you will have written a resume that shows you in your best possible light.
Learn How to Deal With Resume Challenges
Lisa has used this process successfully with clients from all walks of life and with all kinds of work histories. She has written resumes for: career changers people returning to work after several years without paid employment new immigrants recent graduates older workers people in competitive and declining industries This book isn't just for the lucky few who have a perfect career history. It gets into the heart of how to write resumes that pop even if you're worried that you may have some challenges to overcome.
New for 2015
The second edition has been revised and expanded to include up-to-date information about trends in resume writing and job hunting including 2 new chapters about writing applicant tracking system (ATS) optimized resumes.
Not a 20 Minute Resume Guide!
This book is not for people who want to knock out a resume in 20 minutes. It is a meticulous, step-by-step guide through each phase in the resume writing process. It shows you how to structure each section, write compelling statements, and make smart decisions about content to highlight your individual strengths and minimize weaknesses. Thoughtfully completing the tasks in this book will take time, but it will be time well spent. In the end, you will have a winning resume that is perfect for your needs and structured to show you at your best.
Partners in Resume Writing
Good career coaches will not write a resume for you; they will write one with you, as partners. You and the career coach both bring important information to the table. Throughout this book, you and Lisa will be partners. Lisa will be the expert on how to create a resume. You will be the expert on your own career. Lisa will show you: how to decide what information you should include, how to write compelling content, how to structure

sections to highlight your strengths, and how to minimize concerns you may have about your work history. Your task is to take that information and apply it to what you know about your own career. In this partnership, you can create an effective resume that gets you one big step closer to landing the job you want. Scroll up and click to buy!

Editor Anne McKinney Reviews and Excerpts Civil engineers, mechanical engineers, structural engineers, marine engineers, chemical engineers, systems engineers, and engineering support personnel have a lot in common when they want to create a resume, and this book shows resumes and cover letters of individuals who want to work in the field. For those who seek federal employment, there's a special section showing how to create federal resumes and government applications. Since many technical types aren't writers, this comes as a special gift: select a winning format, plug in your background specs, and away you go. It's that easy--with REAL RESUMES in hand. - The Midwest Book Review 1-885288-42-5

While teaching the Numerical Methods for Engineers course over the last 15 years, the author found a need for a new textbook, one that was less elementary, provided applications and problems better suited for chemical engineers, and contained instruction in Visual Basic® for Applications (VBA). This led to six years of developing teaching notes that have been enhanced to create the current textbook, Numerical Methods for Chemical Engineers Using Excel®, VBA, and MATLAB®. Focusing on Excel gives the advantage of it being generally available, since it is present on every computer—PC and Mac—that has Microsoft Office installed. The VBA programming environment comes with Excel and greatly enhances the capabilities of Excel spreadsheets. While there is no perfect programming system, teaching this combination offers knowledge in a widely available program that is commonly used (Excel) as well as a popular academic software package (MATLAB). Chapters cover nonlinear equations, Visual Basic, linear algebra, ordinary differential equations, regression analysis, partial differential equations, and mathematical programming methods. Each chapter contains examples that show in detail how a particular numerical method or programming methodology can be implemented in Excel and/or VBA (or MATLAB in chapter 10). Most of the examples and problems presented in the text are related to chemical and biomolecular engineering and cover a broad range of application areas including thermodynamics, fluid flow, heat transfer, mass transfer, reaction kinetics, reactor design, process design, and process control. The chapters feature "Did You Know" boxes, used to remind readers of Excel features. They also
