The aim of this manual is to help readers get the best from their vehicle. It provides information on routine maintenance and servicing and the tasks are described and photographed in a step-by-step sequence so that even a novice can do the work.

This paper addresses the issue of threshold effects between public debt and economic growth in the Caribbean. The main finding is that there exists a threshold debt to gross domestic product (GDP) ratio of 55–56 percent. Moreover, the debt dynamics begin changing well before this threshold is reached. Specifically, at debt levels lower than 30 percent of GDP, increases in the debt-to-GDP ratio are associated with faster economic growth. However, as debt rises beyond 30 percent, the effects on economic growth diminishes rapidly and at

debt levels reaching 55-56 percent of GDP, the growth impacts switch from positive to negative. Thus, beyond this threshold, debt becomes a drag on growth.

In the not-too-distant future, in what was once the old City of New York, megacorporations have taken over everything. Now even the internet is owned, and the only way to transmit sensitive information is by a network of highly skilled couriers called "data runners" who run it over the sneakernet. It is a dangerous gig in a dirty world, but Jack Nill doesn't have much choice in the matter. A brilliant young math whiz and champion of parkour, Jack must become one of these data runners in order to get his father out of a major gambling debt. When a mysterious stranger loads Jack's chip with a cryptic cargo that everybody wants, he soon becomes the key figure in a conspiracy that could affect the entire North American Alliance. Now it's all up to Jack. With the help of his best friend, Dexter, and a girl who runs under the name Red Tail, Jack will have to use all his skills to outrun the retrievers and uncover the truth before they catch him and clip him for good.

The first part of this book assesses how television presents viewers with information - contrasting the 'official reality' of news and current affairs programmes with the anarchic view of the world put out by such as Morecambe and Wise and the two Ronnies. It challenges the politics of programme schedules and takes care to consider the language used in programs designed for different purposes. The second, inspiring part contains accounts of three of the author's collaborative video projects which aimed to use the medium of video storytelling to access a different way of teaching. The third and most polemical part of the book explores more about education in relation to television and video. Originally published in 1981, it is a book about the way that television, through massive and constant reinforcement, made its own language the only language; and it presents the attempts – instructive, hilarious, occasionally quite touching – made by the author and students to discover other possible languages that television might use.
