Congestive Heart Failure Concept Map

-The goals of treatment for people with chronic heart failure are the prolongation of life, the prevention of acute decompensation and the reduction of symptoms, allowing for greater activity. 8.3.2.

-Treatment strategies provide significant improvement in the relief of symptoms, exercise tolerance, and a decrease in the likelihood of hospitalization or death.

CONGESTIVE HEART FAILURE | MindMeister Mind Map

Congestive heart failure (CHF), also called as heart failure (HF) is a chronic cardiac condition wherein there is a reduction in the capacity of the heart to sufficiently pump blood throughout the body. This causes the body to have a lower oxygen supply than what it requires.

Congestive Heart Failure CHF Nursing Diagnosis Care Plan ...

The heart fails to pump effectively, causing decreased perfusion forward of the failure and fluid back behind the failure. Heart

Online Library Congestive Heart Failure Concept Map

failure can be left-sided, right-sided, or both. When both sides are failing, it is called congestive heart failure (CHF). Heart failure is measured by ejection fraction. Normally functioning hearts have an ejection fraction of 55-75%. Anything less than 50% is ...

Nursing Care Plan for Congestive Heart Failure (CHF) ...

Congestive heart failure (CHF) is a chronic progressive condition that affects the pumping power of your heart muscles. While often referred to simply as "heart failure," CHF specifically refers...

Congestive Heart Failure: Types, Causes, Stages, and Treatment

Heart failure (HF) or Congestive Heart Failure (CHF) is a physiologic state in which the heart cannot pump enough blood to meet the metabolic needs of the body following any structural or functional impairment of ventricular filling or ejection of blood. Heart failure results from changes in the systolic or diastolic function of the left ventricle. The heart fails when, because of intrinsic ...

Concept Map Congestive Heart Failure

Congestive Heart Failure Pathophysiology and Schematic Diagram

Congestive heart failure (CHF) otherwise known as cardiac failure
refers as the inability of the heart to pump sufficient blood to meet
needs of tissues for oxygenation and nutrition. This disease can
affect the heart's ability to respond to circulation demands of the
body.

Congestive Heart Failure Pathophysiology And Schematic Diagram

Pathophysiology Heart Failure may present acutely as a result of
myocardial ischemia secondary to a MI. The weakened cardiac muscle
causes the CO to decrease. The decreasing cardiac output then triggers
in increased in systemic vascular resistance and afterload, which only
further decreases the CO. Eventually the heart is unable to
effectively push against the increased afterload and fluid ...
