Scholars and practitioners of operas by Handel, Mozart, Thomas, Chabrier, Korngold and Taktakishvili will find new “readings” from hitherto unexplored contexts and contemporary fine art. Also discussed is operatic lighting and the problematics of traditional lighting schemes apropos recent inventive methodologies. Popular sound development of the late 1960s is highlighted through unique oral transcripts. Other chapters discuss the intermediality of music and social media in the work of Brigitta Muntendorf; the visual transcoding of Wagner’s leitmotif technique; a new theory of Affektenlehre, and the art and politics of the Slovenian conceptual music collective Laibach.

The primary perpetrators all drew on primitivism, performance art, and the avant-garde. But they were best known for short songs and even shorter life spans. No Wave traces the history of this unique movement, from early pioneers like Suicide to Richard Hell, to hidden treasures like Red Transistor and 8-Eyed Spy, to descendents like ESG and Sonic Youth. No Wave is a comprehensive guide to a movement whose influence still resonates today.
