Instrumentation And Measurement Discussion. This tutorial is meant to provide our readers conceptual knowledge about various electronic measuring instruments and how to choose a specific measuring instrument based on their requirement. There are two types of measuring instruments: one is the type of measuring instruments that show the values on the scale of the meter, and other are type of measuring instruments that displays the waveforms.

Electronic Instrumentation And Measurements By David A Bell
Instrumentation is a collective term for measuring instruments that are used for indicating, measuring and recording physical quantities. The term has its origins in the art and science of scientific instrument-making. Instrumentation can refer to devices as simple as direct-reading thermometers, or as complex as multi-sensor components of industrial control systems. Today, instruments can be found in laboratories,
