In order for the PCV system to sweep fumes out of the crankcase, the crankcase must have a source of fresh air. The source of this fresh air is the "crankcase breather", which is usually ducted from the engine's intake manifold. The breather is usually provided with baffles and filters to prevent oil mist and vapour from fouling the air filter.

DIY - 1.8t Lower PCV Hose install You are all familiar with it. It's the second crappiest hose setup on the 1.8's, coming in just behind the upper Y hose. Eurojet just came out with an *excellent* replacement that is well worth the time and effort to replace. I hate doing things twice (except my 2nd timing chain is coming on strong) so do this once and don't worry about it again.
