In 2010 Sally Hogshead wrote a book called Fascinate: Your 7 Triggers to Persuasion and Captivation. It focused on using her research into what she then called the Fascination Triggers and using them to market products and services. I was a fan of that book, and was one of the first to recommend it. (You can read my recommendation [here](#).)

Thanks to a fascinating podcast by Derek Halpern of the Social Triggers website, I managed to uncover the answer. In the podcast, he interviewed Sally Hogshead, the Chief Fascination Officer of Fascinate, Inc. and author of Fascinate: Your 7 Triggers to Persuasion and Captivation. Done in a candid yet charming fashion, the interview provided interesting insights on the 7 psychological triggers which companies can employ to achieve better and more targeted results in their marketing.

The seven triggers of fascination - lust, mystique, vice, alarm, power, prestige, trust - are easy to remember but are not really useful because they are blanket terms that encompass whole hosts of things that aren't commonly associated with those words per se. The book is interesting, but unfortunately doesn't really deliver.

A newly revised and updated edition of the influential guide that explores one of the most powerful ways to attract attention and influence behavior—fascination—and how businesses, products, and ideas can become irresistible to consumers. In an oversaturated culture defined by limited time and focus, how do we draw attention to our messages, our ideas, and our products when we only have seconds to compete? Award-winning consultant and speaker Sally Hogshead turned to a wide realm of disciplines, including neurobiology, psychology, and evolutionary anthropology. She began to see specific and interesting patterns that all centered on one element: fascination. Fascination is the most powerful way to capture an audience and influence behavior. This essential book examines the principles behind fascination and explores how those insights can be put to use to sway:

- Which brand of frozen peas you pick in the case
- Which city, neighborhood, and house you choose
- Which profession and company you join
- Where you go on vacation
- Which book you buy off the shelf

Structured around the seven languages of fascination Hogshead has studied and developed—power, passion, innovation, alarm, mystique, prestige, and alert—Fascinate explores how anyone can use these triggers to make products, messages, and services more fascinating—and more successful.

What triggers fascination, and how do companies, people, and ideas put those triggers to use? Why are you captivated by some people but not by others? Why do you recall some brands yet forget the rest? In a distracted, overcrowded world, how do certain leaders, friends, and family members convince you to change your behavior? Fascination: the

most powerful way to influence decision making. It's more persuasive than marketing, advertising, or any other form of communication. And it all starts with seven universal triggers: lust, mystique, alarm, prestige, power, vice, and trust. Fascination plays a role in every type of decision making, from the brands you choose to the songs you remember, from the person you marry to the employees you hire. And by activating the right triggers, you can make anything become fascinating. To explore and explain fascination's irresistible influence, Sally Hogshead looks beyond marketing, delving into behavioral and social studies, historical precedents, neurobiology and evolutionary anthropology, as well as conducting in-depth interviews and a national study of a thousand consumers, to emerge with deeply rooted patterns for why, and how, we become captivated. Hogshead reveals why the Salem witch trials began with the same fixations as those in Sex and the City. How Olympic athletes are subject to obsessions similar to those of fetishists. How a 1636 frenzy over Dutch tulip bulbs perfectly mirrors the 2006 real estate bubble. And why a billion-dollar "Just Say No" program actually increased drug use among teens, by activating the same "forbidden fruit" syndrome as a Victoria's Secret catalog. Whether you realize it or not, you're already using the seven triggers. The question is, are you using the right triggers, in the right way, to get your desired result? This book will show you.

What made the Sopranos finale one of the most-talked-about events in television history? Why is sudoku so addictive and the iPhone so darn irresistible? What do Jackson Pollock and Lance Armstrong have in common with theoretical physicists and Buddhist monks? Elegance. In this thought-provoking exploration of why certain events, products, and people capture our attention and imaginations, Matthew E. May examines the elusive element behind so many innovative breakthroughs in fields ranging from physics and marketing to design and popular culture. Combining unusual simplicity and surprising power, elegance is characterized by four key elements—seduction, subtraction, symmetry, and sustainability. In a compelling, story-driven narrative that sheds light on the need for elegance in design, engineering, art, urban planning, sports, and work, May offers surprising evidence that what's "not there" often trumps what is. In the bestselling tradition of *The Tipping Point*, *Made to Stick*, and *The Black Swan*, *In Pursuit of Elegance* will change the way you think about the world.

The most common triggers for homicide are fear, rage, revenge, money, lust, and, more rarely, sheer madness. This isn't an exact science, of course. Any given murder can have multiple triggers. Sex and revenge seem to be common partners in crime. Rage, money, and revenge make for a dangerous trifecta of triggers, as well. This book offers my memories of homicide cases that I investigated or oversaw. In each case, I examine the trigger that led to death. I chose this theme for the book because even though the why of a murder case may not be critical in an investigation, it can sometimes lead us to the killer. And even if we solve a case without knowing the trigger, the why still intrigues us, disrupting our dreams and lingering in our minds, perhaps because each of us fears the demons that lie within our own psyche—the triggers waiting to be pulled.

On the eve of a secret military operation, an assassin's bullet strikes President Seth Jerrison. He is rushed to the hospital, where surgeons struggle to save his life—and where Professor Ranjip Singh is experimenting with a device that can erase traumatic memories. Then a terrorist bomb detonates. In the operating room, the president suffers cardiac arrest. He has a near-death experience—but the memories that flash through Jerrison's mind are not his own. The electromagnetic pulse generated by the bomb amplified and scrambled Professor Singh's equipment, allowing a random group of people to access one another's minds. One of those people can retrieve the President Jerrison's memories—including classified information regarding the upcoming military mission, which, if revealed, could cost countless lives. But the task of determining who has switched memories with whom is a daunting one—particularly when some of the people involved have reason to lie...
