#1 New York Times Bestseller from the author of *How to Change Your Mind*, *The Omnivore's Dilemma*, and *Food Rules*. There's plenty of it around, and we all love to eat it. So why should anyone need to defend it? Because in the so-called Western diet, food has been replaced by nutrients, and common sense by confusion--most of what we're consuming today is longer the product of nature but of food science. The result is what Michael Pollan calls the American Paradox: The more we worry about nutrition, the less healthy we see to become. With *In Defense of Food*, Pollan proposes a new (and very old) answer to the question of what we should eat that comes down to seven simple but liberating words: "Eat food. Not too much. Mostly plants." Pollan's bracing and eloquent manifesto shows us how we can start making thoughtful food choices that will enrich our lives, enlarge our sense of what it means to be healthy, and bring pleasure back to eating.

#1 New York Times Bestseller The creator of the 100 Days of Real Food blog draws from her hugely popular website to offer simple, affordable, family-friendly recipes and practical advice for eliminating processed foods from your family's diet. Inspired by Michael Pollan's *In Defense of Food*, Lisa Leake decided her family's eating habits needed an overhaul. She, her husband, and their two small girls pledged to go 100 days without eating highly processed or refined foods—a challenge she opened to readers on her blog. Now, she shares their story, offering insights and cost-conscious recipes everyone can use to enjoy wholesome natural food—whole grains, fruits and vegetables, seafood, locally raised meats, natural juices, dried fruit, seeds, popcorn, natural honey, and more. Illustrated with 125 photographs and filled with step-by-step instructions, this hands-on cookbook and guide includes: Advice for navigating the grocery store and making smart purchases Tips for reading ingredient labels 100 quick and easy recipes for such favorites as Homemade Chicken Nuggets, Whole Wheat Pasta with Kale Pesto Cream Sauce, and Cinnamon Glazed Popcorn Meal plans and suggestions for kid-pleasing school lunches, parties, and snacks "Real Food" anecdotes from the Leakes' own experiences A 10-day mini starter-program, and much more.

We're told that if we care about our health—or our planet—eliminating red meat from our diets is crucial. That beef is bad for us and cattle farming is horrible for the environment. But science says otherwise. Beef is framed as the most environmentally destructive and least healthy of meats. We're often told that the only solution is to reduce or quit red meat entirely. But despite what anti-meat groups, vegan celebrities, and some health experts say, plant-based agriculture is far from a perfect solution. In *Sacred Cow*, registered dietitian Diana Rodgers and former research biochemist and New York Times bestselling author Robb Wolf explore the quandaries we face in raising and eating animals—focusing on the largest (and most maligned) of farmed animals, the cow. Taking a critical look at the assumptions and misinformation about meat, *Sacred Cow* points out the flaws in our current food system and in the proposed "solutions." Inside, Rodgers and Wolf reveal contrarian but science-based findings, such as: □ Meat and animal fat are essential for our bodies. □ A sustainable food system cannot exist without animals. □ A vegan diet may destroy more life than sustainable cattle farming. □ Regenerative cattle ranching is one of our best tools at mitigating climate change. You'll also find practical guidance on how to support sustainable farms and a 30-day challenge to help you transition to a healthful and conscientious diet. With scientific rigor, deep compassion, and wit, Rodgers and Wolf argue unequivocally that meat (done right) should have a place on the table. It's not the cow, it's the how!

Traveling to the New World in 1606 as the page to Captain John Smith, twelve-year-old orphan Samuel Collier settles in the new colony of James Town, where he must quickly learn to distinguish between friend and foe. Reprint.

An easily implemented sports nutrition program for the weekend warrior, the Olympic athlete, and everyone in between from one of the country's most respected experts in sports medicine. In *Running Doc's Guide to Healthy Eating*, readers will discover Dr. Lewis G. Maharam's unique Fueling Plates Program. Developed in 2012, it has helped countless sofa spuds who really just want to get off the couch and lose weight, marathoners competing for a place at the Olympic trials, and everyone in between, including recreational athletes who play tennis, soccer, basketball and other running sports. The Fueling Plates Program is designed primarily to boost the performance of athletes, but can also boost the health of the average person, athletic or not. Every day at Maharam's busy New York City practice, in addition to treating sports injuries, he offers his patients nutritional advice. They ask him: "When should I eat before the marathon?" "Do I really need to drink eight glasses of water a day?" "What about sports drinks?" "Should I use energy gels?" "Gingko?" "Glucosamine?" "Raspberry ketones?" The questions come because the bulk of the sports-nutrition books on the market today make fueling your body sound like a scientific experiment. *The Running Doc's Guide to Healthy Eating* explains why it's time to ditch the difficult-to-use food pyramid put out by the USDA in favor of a hands-on experience of your actual plate — what Maharam calls Fueling Plates. It shows, step by step, how readers can apply the program to feel and perform better and have more energy. Those who are already exercising will get faster by eating to fuel their body more efficiently. Even everyday activities become easier with the Fueling Plates Program. Readers who are willing to take advantage of everything revealed in the book, from what to eat to reduce muscle soreness after exercising to how much to drink to be hydrated properly to an individualized nutrition program, will transform their lives.

"Outstanding . . . a wide-ranging invitation to think through the moral ramifications of our eating habits." —The New Yorker One of the New York Times Book Review's Ten Best Books of the Year and Winner of the James Beard Award Author of *How to Change Your Mind* and the #1 New York Times Bestseller *In Defense of Food* and *Food Rules* What should we have for dinner? Ten years ago, Michael Pollan confronted us with this seemingly simple question and, with *The Omnivore's Dilemma*, his brilliant and eye-opening exploration of our food choices, demonstrated that how we answer it today may determine not only our health but our survival as a species. In the years since, Pollan's revolutionary examination has changed the way Americans think about food. Bringing wide attention to the little-known but vitally important dimensions of food and agriculture in America, Pollan launched a national conversation about what we eat and the profound consequences that even the simplest everyday food choices have on both ourselves and the natural world. Ten years later, *The Omnivore's Dilemma* continues to transform the way Americans think about the politics, perils, and pleasures of eating.

captured hearts and minds worldwide with his magnetic performances, sharp wit, and outspoken commitment to equal rights. But long before he braved new frontiers in STAR TREK, he woke up as a four-year-old boy to find his own birth country at war with his father's -- and their entire family forced from their home into an uncertain future. In 1942, at the order of President Franklin D. Roosevelt, every person of Japanese descent on the west coast was rounded up and shipped to one of ten "relocation centers," hundreds or thousands of miles from home, where they would be held for years under armed guard. **THEY CALLED US ENEMY** is Takei's firsthand account of those years behind barbed wire, the terrors and small joys of childhood in the shadow of legalized racism, his mother's hard choices, his father's tested faith in democracy, and the way those experiences planted the seeds for his astonishing future. What does it mean to be American? Who gets to decide? George Takei joins cowriters Justin Eisinger & Steven Scott and artist Harmony Becker for the journey of a lifetime.
