Drawing on concepts originated by Carl Jung, this book distinguishes four categories of personality styles and shows how these qualities determine the way you perceive the world and come to conclusions about what you've seen. It then explains what they mean for your success in school, at a job, in a career and in your personal relationships. Determine your personality using a scientifically validated method based on the work of C.G. Jung and gain insight into why others behave the way they do, and why you are the person you are. What's your type? Would you rather celebrate with the whole crowd or just a few friends? . . . focus on the facts or get an overall impression? . . . go with what [!seems logical!](#) or what [!feels fair!](#)? . . . keep to a schedule or keep your options open? How you answer these questions is the very beginning of understanding who you are and how you relate to those around you, by using a new and exciting method called Typewatching. Otto Kroeger and Janet M. Thuesen have developed Typewatching from the Myers-Briggs Type Indicator, which was derived from the work of C. G. Jung. Now they have put together the first and only popular guide to the MBTI in Type Talk. Here is a one-of-a-kind guide that describes this scientifically validated approach to [!name-calling!](#) a method that has been used for more than forty years by individuals, families, corporations, and governments who want to communicate better. Typewatching as explained in Type Talk is easy to learn and natural to use. With even moderate practice it can help teachers teach and students learn, workers work and bosses boss. It can help lovers love, parents parent, and everyone accept themselves and others more easily. Best of all, Typewatching is fun. Type Talk examines the four pairs of preferences that are fundamental to every personality type: Extraversion/Introversion, Sensing/Intuition, Thinking/Feeling, and Judging/Perceiving. Kroeger and Thuesen provide a self-evaluation that can be used to determine which of each of these preferences best describes you. They delineate every combination of preferences;there are 16 different personality types, so you are sure to find yourself!and they go on to demonstrate how to analyze and evaluate other people as well. Once armed with this knowledge, you will learn how to thrive in a world of so many different types. Here is a celebration of the similarities and differences in people, an odyssey of discovery in which the final destination is success, satisfaction, and serenity.

Drawing from Jungian psychology and pop culture, this detailed guide to personality types will help you develop a deeper, more meaningful sense of your truest self For Jung, knowing your type was essential to understanding yourself: a way to measure personal growth and change. But his ideas have been applied largely in the areas of career and marital counseling, so type has come to seem predictive: a way to determine your job skills and social abilities. This book reclaims type as a way to talk about people's inner potential and the choices they make in order to honor it. Using everyday examples from popular culture/films, Star Trek, soap operas, comic strips;it describes the sixteen basic ways people come to terms with their gifts and values. In this book you will find tools to understand: [! How your personality takes shape](#) [! How your type reflects not only your current priorities, but your hidden potential](#) [! How univred possibilities are trying to get your attention](#) [! How relationships at home and at work can help you to tap your unrealized gifts](#)

Some years ago the author became very much impressed with the fact, which can be observed in any engineering organization, that the chief obstacles to the success of individual engineers or of the group comprising a unit were of a personal and administrative rather than a technical nature. It was apparent that both the author and his associates were getting into much more trouble by violating the unwritten laws of professional conduct than by committing technical sins against the well-documented laws of science. Since the former appeared to be indeed unwritten at that time, as regards any adequate and convenient text, the following [!laws!](#) were originally formulated and collected into a sort of scrapbook, to provide a set of house rules, or a professional code, for a design-engineering section of a large manufacturing organization. Although they are admittedly fragmentary and incomplete, they are offered here for whatever they may be worth to younger men just starting their careers, and to older men who know these things perfectly well but who all too often fail to apply them in practice. Just a few points should be emphasized: None of these [!laws!](#) is theoretical or imaginary, and however obvious and trite they may appear, their repeated violation is responsible for much of the frustration and embarrassment to which engineers everywhere are liable. In fact this paper is primarily a record, derived from direct observation over a period of seventeen years, of the experience of four engineering departments, three of them newly organized and struggling to establish themselves by the trial-and-error method. It has, however, been supplemented and confirmed by the experience of others as gathered from numerous discussions, lectures, and the literature, so that it most emphatically does not reflect the unique experience or characteristics of any one organization. Furthermore, many of these rules are generalizations to which exceptions will occur in special circumstances. There is no thought of urging a slavish adherence to rules and red tape, for there is no substitute for judgment, and at times vigorous individual initiative is needed to cut through formalities in an emergency. But in many respects these laws are like the basic laws of society; they cannot be violated too often with impunity, notwithstanding striking exceptions in individual cases.

Isabel Myers won a national Detective Murder Mystery Contest in 1929 with the publication of this book. She saw an advertisement for the contest, decided to enter and completed the book in five months. She bested a young Ellery Queen to win the contest! The characters are crafted as "type portraits" and are as much fun to figure out today as they were when the young Isabel wrote the book. A re-published classic.
