Wall mounted air conditioners are arguably the most popular form of AC units in the UK, used to eliminate warm air from the room. This is due in part to the recognition of the affordability of these cooling units as well as their flexibility in aesthetic and positioning. The units can be mounted on almost any wall and are positioned at a high level on the wall, ensuring an unobtrusiveness that will easily blend into the background in most settings.

Some times called high wall air conditioners, wall mounted monoblock air conditioning is a neat solution to older buildings where planning does not permit the installation of an external condenser unit. The wall mounted monoblock air conditioner attaches high on the wall and two air pipes are routed from the back directly through the wall. The disadvantage of these air conditioners is that they are slightly larger in-depth compared to split wall mounted unit as the condenser is contained ...

The EASYfit split air conditioners comprise two elements - an internal and an external unit. The internal unit is fitted to a metal mounting plate on a wall in the room to be cooled, whilst the external unit is situated outside the building. The two are connected using copper pipe. The external unit, or condenser, removes the heat from the room and dissipates it outside, along with any condensation that's built-up in the system, whilst the internal unit provides cooling.
