The National Wildfire Coordinating Group provides national leadership to enable interoperable wildland fire operations among federal, state, local, tribal, and territorial partners. Primary objectives include: Establish national interagency wildland fire operations standards. Recognize that the decision to adopt standards is made independently by the NWCG members and communicated through their respective directives systems; Establish wildland fire position standards, qualifications requirements, and performance support capabilities (e.g. training courses, job aids) that enable implementation of NWCG standards; Support the National Cohesive Wildland Fire Management Strategy goals: to restore and maintain resilient landscapes; create fire adapted communities; and respond to wildfires safely and effectively; Establish information technology (IT) capability requirements for wildland fire; and Ensure that all NWCG activities contribute to safe, effective, and coordinated national interagency wildland fire operations. The objectives of the "Interagency Helicopter Operations Guide" (IHOG) are to: Promote safe, cost-efficient and effective aviation services in support of agency and interagency goals and objectives; Define and standardize national, interagency helicopter management and operational procedures for helicopter users from participating agencies; Through standardization, facilitate the ability of personnel from different agencies to work cooperatively on incidents or projects; and Provide a framework within which areas, regions, states, and local units can provide supplemental, site-specific guidance. The procedures contained in this guide apply to helicopter operations conducted by providers and users of helicopters from participating agencies. This guide addresses both incident and resource helicopter operations.

Providing a detailed look at helicopter maneuvers, the information in this guide helps to solidify concepts gained from flight training in a student pilot's mind by incorporating the Practical Test Standards into every maneuver description. The graphical and textual explanations work in conjunction with an instructor's lessons, allowing students to prepare before sessions and to review afterwards as well. Because helicopter pilots must rely on their memory or understanding of a particular maneuver, the Helicopter Maneuvers Manual provides readers with a crystal-clear picture of what level of performance is expected of them every step and includes insights into the common errors associated with each move.

This publication shows designated first-aid providers how to diagnose, treat, and prevent the health problems of seafarers on board ship. This edition contains fully updated recommendations aimed to promote and protect the health of seafarers, and is consistent with the latest revisions of both the WHO Model List of Essential Medicines and the International Health Regulations.--Publisher's description.

Sailing Directions 182 (Enroute) covers the north and west coasts of Norway from Kristiansand, across the coast of the Norwegian Sea, to the Barents Sea at Vardo. It is issued for use in conjunction with Sailing Directions 180 (Planning Guide) Arctic Ocean. The companion volumes are Sailing Directions 181 and 183.
