Harley Davidson Engine Case Repair

Early Harley cases are extremely difficult to weld due to the quality of aluminum used in the castings. We have a very talented certified welder, in house, that makes it look easy. Once the cases were repaired, we fit both case halves together and finished alining all surfaces such as motor mounts and cylinder deck.

HARLEY STYLE ENGINE CASES MACHINING & REPAIRS

When confronted with a cracked engine case, the motorcycle restorer has two options, find a replacement or have the case welded. To repair cracked cases correctly, the case halves need to be separated, which requires the top end of the motor to be removed. Then the cases have to be made spotlessly clean.

This will get you into looking at copies of Harley parts books for your year. Go to engine and oil pump and you will find the tappet screen and where it is. It will also show you how it goes back together. It is lockated near your oil pump on the rear of the right case. When ever you pull the spark plugs get a small light to shine in the hole.
