It's the Roaring Twenties in foggy San Francisco. Prohibition is on, inhibitions are low, and dark magic is rolling into town... Archaeologist Lowe Magnusson is packing something everyone wants. The djed amulet, a priceless Egyptian artifact, will fetch Lowe a hefty paycheck from one of San Francisco's wealthiest. But when the handsome Swede runs into his patron's uptight daughter, what he once considered easy money becomes maddeningly complicated. Cursed with deadly spirits as her constant companions, curator Hadley Bacall must keep calm to hold her dangerous spectators at bay and prevent them from lashing out at anything—or anyone. Trouble is, Lowe is driving her crazy, but her father needs the artifact he's transporting. While Hadley can feel the amulet's power, she can't fathom the destruction—or the desire—it's about to stir up.

This year, thousands of students will test out of classes by taking a CLEP test. Practice partial differential equations with this student solutions manual Corresponding chapter-by-chapter with Walter Straus's Partial Differential Equations, this student solutions manual consists of the answer key to each of the practice problems in the instructional text. Students will follow along through each of the chapters, providing practice for areas of study including waves and diffusions, reflections and sources, boundary problems, Fourier series, harmonic functions, and more. Coupled with Straus's text, this solutions manual provides a complete resource for learning and practicing partial differential equations.

A comprehensive introduction to the hardware, parameters, and architectures of RF/microwave wireless systems As the basis for some of the hottest technologies of the new millennium, radio frequency (RF) and microwave wireless systems rapidly propel us toward a future in which the transmission of voice, video, and data communications will be possible anywhere in the world through the use of simple, handheld devices. This book provides scientists and engineers with clear, thorough, up-to-date explanations of all aspects of RF and microwave wireless systems, including general hardware components, system parameters, and architectures. Renowned authority Kai Chang covers both communication and radar/sensor systems and extends the discussion to other intriguing topics, from global positioning systems (GPS) to smart highways and smart automobiles. With an emphasis on basic operating principles, Dr. Chang reviews waves and transmission lines, examines modulation and demodulation and multiple-access techniques, and helps bridge the gap between RF/microwave engineering and communication system design. Ample practical examples of components and system configurations and nearly 300 illustrations and photographs complete this timely and indispensable resource. An Instructor's Manual presenting detailed solutions to all the problems in the book is available from the Wiley editorial department.

For Introductory Geology courses This user-friendly, best-selling lab manual examines the basic processes of geology and their applications to everyday life. Featuring contributions from over 170 highly regarded geologists and geoscience educators, along with an exceptional illustration program by Dennis Tasa, Laboratory Manual in Physical Geology, Tenth Edition offers an inquiry and activities-based approach that builds skills and gives students a more complete learning experience in the lab. The text is available with MasteringGeology(tm); the Mastering platform is the most effective and widely used online tutorial, homework, and assessment system for the sciences. Note: You are purchasing a standalone product; Mastering does not come packaged with this content.
