Drawing on new scholarship, the Pulitzer Prize-winning author of The Woman Behind the New Deal presents a biography of Isabella of Castile, the controversial Queen of Spain who sponsored Christopher Columbus' journey to the New World, established the Spanish Inquisition and became one of the most influential female rulers in history. Simultaneous.

An engrossing and revolutionary biography of Isabella of Castile, the controversial Queen of Spain who sponsored Christopher Columbus's journey to the New World, established the Spanish Inquisition, and became one of the most influential female rulers in history Born at a time when Christianity was dying out and the Ottoman Empire was aggressively expanding, Isabella was inspired in her youth by tales of Joan of Arc, a devout young woman who unified her people and led them to victory against foreign invaders. In 1474, when most women were almost powerless, twenty-three-year-old Isabella defied a hostile brother and a mercurial husband to seize control of Castile and León. Her subsequent feats were legendary. She ended a twenty-four-generation struggle between Muslims and Christians, forcing North African invaders back over the Mediterranean Sea. She laid the foundation for a unified Spain. She sponsored Columbus's trip to the Indies and negotiated Spanish control over much of the New World with the help of Rodrigo Borgia, the infamous Pope Alexander VI. She also annihilated all who stood against her by establishing a bloody religious Inquisition that would darken Spain's reputation for centuries. Whether saintly or satanic, no female leader has done more to shape our modern world, in which millions of people in two hemispheres speak Spanish and practice Catholicism. Yet history has all but forgotten Isabella's influence, due to hundreds of years of misreporting that often attributed her accomplishments to Ferdinand, the bold and philandering husband she adored. Using new scholarship, Downey's luminous biography tells the story of this brilliant, fervent, forgotten woman, the faith that propelled her through life, and the land of ancient conflicts and intrigue she brought under her command.

Presents a portrait of the first female cabinet member and one of the most influential women of the twentieth century, whose efforts to improve the lives of America's working people resulted in such initiatives as unemployment insurance and Social Security.

1474. Castile was the largest, strongest, and most populous kingdom in Hispania-- and Isabella ascended the throne, a female ruler in a male-dominated world. Her marriage to Ferdinand of Aragon not only united their kingdoms, but began a royal partnership in which Isabella more than held her own. Tremlett chronicles Isabella's colorful life as she led her country out of the Middle Ages and harvested the ideas and tools of the Renaissance to turn her nation into a sharper, early modern state.

Isabella (1441-1504) was a master strategist, seizing the crown of Castile and, with husband Ferdinand of Aragon, ruling both her kingdom and his and winning a virtually nonstop succession of wars to preserve their strongholds. Freelance journalist Rubin presents the queen also as loving wife and mother, promoter of the arts and sponsor of Columbus, views emphasized to soften the dominant persona: Isabella la Catolica. Her goal to make Spain exclusively and permanently Catholic drove the queen to supporting the tortures of the Inquisition, burning dissenters at the stake and evicting Jews from the country. Packed with information, the book holds the reader's interest, despite pedestrian prose and a clear bias in Isabella's favor. Illustrations not seen by PW. (Oct.)

||Helen Castor has an exhilarating narrative gift. . . . Readers will love this book, finding it wholly absorbing and rewarding.|| ||Hilary Mantel, Booker Prize-winning author of Wolf Hall In the tradition of Antonia Fraser, David Starkey, and Alison Weir, prize-winning historian Helen Castor delivers a compelling, eye-opening examination of women and power in England, witnessed through the lives of six women who exercised power against all odds—and one who never got the chance. Exploring the narratives of the Empress Matilda, Eleanor of Aquitaine, Isabella of France, Margaret of Anjou, and other ||she-wolves,|| as well as that of the Nine Days' Queen, Lady Jane Grey, Castor invokes a magisterial discussion of how much—and how little—has changed through the centuries.

Called by her people Isabella la Catolica, she was by any standard one of the greatest women of all history. A saint in her own right, she married Ferdinand of Aragon, and they forged modern Spain, cast out the Moslems, discovered the New World by backing Columbus, and established a powerful central government in Spain. This story is so thrilling it reads like a novel. Makes history really come alive. Highly readable and truly great in every respect!

Philip II is not only the most famous king in Spanish history, but one of the most famous monarchs in English history: the man who married Mary Tudor and later launched the Spanish Armada against her sister Elizabeth I. This compelling biography of the most powerful European monarch of his day begins with his conception (1526) and ends with his ascent to Paradise (1603), two occurrences surprisingly well documented by contemporaries. Eminent historian Geoffrey Parker draws on four decades of research on Philip as well as a recent, extraordinary archival discovery—a trove of 3,000 documents in the vaults of the Hispanic Society of America in New York City, unread since crossing Philip's own desk more than four centuries ago. Many of them change significantly what we know about the king. The book examines Philip's long apprenticeship; his three principal interests (work, play, and religion); and the major political, military, and personal challenges he faced during his long reign. Parker offers fresh insights into the causes of Philip's leadership failures: was his empire simply too big to manage, or would a monarch with different talents and temperament have fared better?
