This volume deals with the children's socialization on the Trobriands. After a survey of ethnographic studies on childhood, the book zooms in on indigenous ideas of conception and birth-giving, the children's early development, their integration into playgroups, their games and their education within their 'own little community' until they reach the age of seven years. During this time children enjoy much autonomy and independence. Attempts of parental education are confined to a minimum. However, parents use subtle means to raise their children. Educational ideologies are manifest in narratives and in speeches addressed to children. They

provide guidelines for their integration into the Trobrianders' "balanced society" which is characterized by cooperation and competition. It does not allow individual accumulation of wealth – surplus property gained has to be redistributed – but it values the fame acquired by individuals in competitive rituals. Fame is not regarded as threatening the balance of their society.

The first part of this book presents an introduction to the theory of finite fields, with emphasis on those aspects that are relevant for applications. The second part is devoted to a discussion of the most important applications of finite fields especially information theory, algebraic coding theory and cryptology (including some very recent material that has never before appeared in book form). There is also a chapter on applications within mathematics, such as finite geometries, combinatorics, and pseudorandom sequences. Worked-out examples and list of exercises found throughout the book make it useful as a textbook.

The ten volumes of "Handbook of Pragmatics Highlights" focus on the most salient topics in the field of pragmatics, thus dividing its wide interdisciplinary spectrum in a transparent and manageable way. While other volumes select philosophical, cognitive, grammatical, social, variational, interactional, or discursive angles, this second volume reviews basic topics and traditions that place language use in its cultural context. As emphasized in the introduction, and as revealed in the choice of articles, culture is by no means to be seen as standing in opposition to society and cognition; on the contrary, the notion cannot be understood without insight into the intricate interactions of social and cognitive structures and processes. In addition to the topical articles, a number of contributions to this volume is devoted to aspects of methodology. Others highlight the role of eminent scholars who have made the study of cultural dimensions of language use into what it is today."

The series builds an extensive collection of high quality descriptions of languages around the world. Each volume offers a comprehensive grammatical description of a single language together with fully analyzed sample texts and, if appropriate, a word list and other relevant information which is available on the language in question. There are no restrictions as to language family or area, and although special attention is paid to hitherto undescribed languages, new and valuable treatments of better known languages are also included. No theoretical model is

imposed on the authors; the only criterion is a high standard of scientific quality.

A guide for parents, educators, and caregivers on how to inspire unmotivated children identifies teaching strategies that can be applied to a variety of personality types, in a resource that explains how adults can become healthy and work-oriented role models.

participation at home and in the community. This book analyses community rehabilitation needs from many different perspectives, including the views of disabled people, rehabilitation clinicians and service providers. Many examples of community rehabilitation schemes are presented, with evidence for their effectiveness, and case studies are used to highlight the main issues. The authors take an international view, and there are chapters dealing with the disabled child in the community and with neuropsychological rehabilitation. This important book examines the growing trend towards community rehabilitation in neurology and is directed towards all clinicians involved with neurorehabilitation.
