Falklands War and tells how a facility consisting of next to nothing was turned into the advanced logistic base for one of the most daring and successful displays of military force at long range in the reclamation of British interests. From an island which was largely devoid of all resources, the story of how Ascension Island became the Forward Operating Base, doubled its population in a few weeks and briefly became the busiest airfield in the world - 350 take off and landings in one day - makes fascinating reading. Air-to-air refuelling proved itself to be a vital force extender

While many books have been written on the Falklands War, this is the first to focus on the vital aspect of logistics. The challenges were huge; the lack of preparation time; the urgency; the huge distances involved; the need to requisition ships from trade to name but four. After a brief discussion of events leading to Argentina's invasion the book describes in detail the rush to re-organise and deploy forces, despatch a large task force, the innovative solutions needed to sustain the Task Force, the vital staging base at Ascension Island,

War the in-theatre resupply, the set-backs and finally the restoring of order after victory. Had the logistics plan failed, victory would have been impossible and humiliation inevitable, with no food for the troops, no ammunition for the guns, no medical support for casualties etc. The lessons learnt have never been more important with increasing numbers of out-of-area operations required in remote trouble spots at short notice. The Falklands experience is crucial for the education of new generations of military planners and fascinating for military buffs and this book

The search began in 1946 for a location to conduct long-range missile tests. Cape Canaveral was chosen in part due to a nearby deactivated military base that could support a long-range proving ground for test firing missiles. The base, originally known as Banana River Naval Air Station, was eventually renamed Patrick Air Force Base in honor of a distinguished Army general. Today, Patrick is part of Air Force Space Command, and it is operated by the 45th

This is the seventh report of the 2007-08 session from the Foreign Affairs Committee (HCP 147-I, ISBN 9780215521477) and focuses on the issue of Overseas Territories. Altogether 45 conclusions and recommendations are set out under the following headings, covering:

- constitutional relationships;
- governance;
- rule of law;
- human rights;
- environmental governance;

Specific recommendations
include: that the Committee
commends the Government's
encouragement of Overseas
Territories in reviewing
their constitutions and
setting out proposals for
reform; that Gibraltar's
presence on the UN list of
non-self-governing

War Territories funding requirements for conservation and ecosystem management; that Governors within Overseas Territories should use reserve powers to deal with irregularities, such as money laundering, in offshore financial services (for a related publication, see HCP 4, session 2007-08 NAO: Managing Risk in Overseas Territories). The Committee states that the Government has acted decisively in some Overseas Territories but in some other cases, has been too hands-off (eg. the corruption allegations on the Turks & Caicos Islands). Also that the choice of
