NEW YORK TIMES BESTSELLER • Debbie Macomber has written an emotionally stirring novel that shows how sometimes a choice can seem wrong even though it ' s absolutely right. If not for her loving but controlling parents, Beth Prudhomme might never have taken charge of her life and moved from her native Chicago to Portland, Oregon, where she ' s reconnected with her spirited Aunt Sunshine and found a job as a high school music teacher. If not for her friend Nichole, Beth would never have met Sam Carney, although first impressions have left Beth with serious doubts. Sam is everything Beth is not—and her parents ' worst nightmare: a tattooed auto mechanic who ' s rough around the edges. Reserved and smart as a whip, Beth isn ' t exactly Sam ' s usual beer-drinking, pool-playing type of woman, either. But if not for an awkward setup one evening, Beth might never have left early and been involved in a car crash. And if not for Sam—who witnessed the terrifying ordeal, rushed to her aid, and stayed with her until help arrived—Beth might have been all alone, or worse. Yet as events play out, Sam feels compelled to check on Beth almost daily at the hospital—even bringing his guitar to play songs to lift her spirits. Soon their unlikely friendship evolves into an intense attraction that surprises them both. Before long, Beth ' s strong-willed mother, Ellie, blows into town spouting harsh opinions,

"Fascinating.... Lays a foundation for understanding human history."—Bill Gates In this "artful, informative, and delightful" (William H. McNeill, New York Review of Books) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war --and adventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, *Guns, Germs, and Steel* chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth club of California's Gold Medal.
