This edited volume provides a critical review of political communication research conducted in Asia over the past twenty years. Each chapter focuses on studies published in a specific Asian country, selected according to the level of contribution made to the field of

political communication in Asia. Covering China, Hong Kong, Taiwan, South Korea, Japan, Singapore, Malaysia, Indonesia, and India, the book's primary objective is to review the unique theoretical accomplishments made by Asian communication scholars, thus contributing to a better awareness and understanding of political communication research in Asia. The contributors are well-respected Asian media scholars writing on political communication in their countries of origin. Each author reviews studies conducted and published in his/her native country and language(s). This book provides a first review of these studies, most of which have never been published in English, and makes them available to international scholars. The contributors discuss each country's political background, and address the findings and conclusions of the political communication studies conducted in their respective countries during the past two decades. The chapters focus on insights that have been made by adapting Western media theories to the unique social, cultural, or political contexts that exist in each country. The authors also point out possible gaps in the current research within their respective countries and to make recommendations for future studies.

Author Vizard covers blending the bowls, basic porting procedures, as well as pocket porting, porting the intake runners, and many advanced procedures. Advanced procedures include unshrouding valves and developing the ideal port area and angle.

Krause Publications' Standard Catalog series is available by specific marque, in individual volumes or a set. Each book contains in-depth profiles of specific makes by model, factory photos, and up-to-date vehicle pricing. The 1-to-conditional pricing system assures readers of accurate values, whether a vehicle is a #1 low-mileage, rust-free beauty or a #6 parts-only heap. "Techs & specs", original factory prices, production and serial numbers, and engine/chassis codes are noted by model, thus helping you determine authenticity accuracy. Historical, technical and pricing information are combined from hundreds of sources. James Flammang values each model according to the popular 1-6 grading system invented by Old Cars magazine.

Covers all models of Amigo, Hombre, Pick-Ups, Rodeo and Trooper, 2 and 4 wheel drive, gasoline and diesel engines.

Designed as a textbook for undergraduate students in various engineering disciplines—Mechanical, Civil, Industrial Engineering, Electronics Engineer-ing and Computer Science—and for postgraduate students in Industrial Engineering and Water Resource Management, this comprehensive and well-organized book, now in its Second Edition, shows how complex economic decisions can be made from a number of given alternatives. It provides the managers not only a sound basis but also a clear-cut approach to making decisions. These decisions will ultimately result in minimizing costs and/or maximizing benefits. What is more, the book adequately illustrates the concepts with numerical problems and Indian cases. While retaining all the chapters of the previous edition, the book adds a number of topics to make it more comprehensive and more student friendly. What's New to This Edition • Discusses different types of costs such as average cost, recurring cost, and life cycle cost. • Deals with different types of cost estimating models, index numbers and capital allowance. • Covers the basics of nondeterministic decision making. • Describes the meaning of cash flows with probability distributions and decision making, and selection of alternatives using simulation. • Discusses

the basic concepts of Accounting. This book, which is profusely illustrated with worked-out examples and a number of diagrams and tables, should prove extremely useful not only as a text but also as a reference for those offering courses in such areas as Project Management, Production Management, and Financial Management.

English for International Journalists is a clear and engaging step-by-step guide for non-native speakers using English in journalism across all forms of media. In-depth language analysis is provided in the specialised context of journalism, as well as a comprehensive approach to the rules and guidelines necessary for avoiding the pitfalls and errors that undermine accuracy and clarity. The book, written by Mike Gandon and edited by Heather Purdey, covers a broad range of vital subjects, including:

- Making contact
- Interviewing
- Grammar and journalistic writing
- Sensitive issues
- The language of argument
- The language of impartial and accurate reporting
- Bloggers and broadcasters
- Reporting economy, health and the environment.

The book is closely supported by online resources concentrating on the spoken word, intonation and pronunciation, and also features an expansive range of exercises and tests, suitable for self-study or to be set as coursework. English for International Journalists presents readers with the essential tools for producing journalism in English today.
