Statistical universals (A large number
of languages - i.e. significantly above
chance level - have X) Implicational
universals (if a language has X, it also
has Y) - this also comes in absolute
and statistical flavours. Suppose your
hypothesis is that there is an absolute
implicational universal that adjectival
agreement implies verbal agreement.

Distributional Typology is a general framework for comparative linguistics that applies statistical methods to fine-grained databases in order to determine the factors driving the distribution of linguistic patterns over time and space. Distributional Typology can be seen as one specific approach to the question «What's Where Why» that is increasingly moving center stage in typology.
