In this gripping ethnography, Jeffrey J. Sallaz goes behind the scenes of the global casino industry to investigate the radically different worlds of work and leisure he found in identically designed casinos in the United States and South Africa. Seamlessly weaving political and economic history with his own personal experience, Sallaz provides a riveting account of two years spent working

among both countries' casino dealers, pit bosses, and politicians. While the popular imagination sees the Nevada casino as a hedonistic world of consumption, The Labor of Luck shows that the "Vegas experience" is made possible only through a variety of systems regulating labor, capital, and consumers, and that because of these complex dynamics, the Vegas casino cannot be seamlessly picked up and replicated elsewhere. Sallaz's fresh and path-breaking approach reveals how neo-liberal versus post-colonial forms of governance produce divergent worlds at the tables, and how politics, profits, and pleasure have come together to shape everyday life in the new economy.

Recruiting an all-volunteer military is a formidable task. To successfully enlist one eligible recruit, the Army must contact approximately 120 young people. The National Research Council explores the various factors that will determine whether the military can realistically expect to recruit an adequate fighting force—one that will meet its upcoming needs. It also assesses the military's expected manpower needs and projects the numbers of youth who are likely to be available over the next 20 years to meet these needs. With clearly written text and useful graphics, *Attitudes, Aptitudes, and Aspirations of American Youth* offers an overview of important issues for military recruiters, touching on a number of important topics including: sex and race, education and aptitude, physical and moral attributes, and military life and working conditions. In addition, the book looks at how a potential recruit would approach the decision to enlist, considering personal, family, and social values, and the options for other employment or college. Building on the need to increase young Americans' propensity to enlist, this book offers useful recommendations for increasing educational opportunities while in the service and for developing advertising strategies that include concepts of patriotism and duty to
