This text describes the functions that the BIOS controls and how these relate to the hardware in a PC. It covers the CMOS and chipset set-up options found in most common modern BIOSs. It also features tables listing error codes needed to troubleshoot problems caused by the BIOS.

Emphasizing a conceptual understanding of concrete design and analysis, this revised and updated edition builds the student's understanding by presenting design methods in an easy to understand manner supported with the use of numerous examples and problems. Written in intuitive, easy-to-understand language, it includes SI unit examples in all chapters, equivalent conversion factors from US customary to SI throughout the book, and SI unit design tables. In addition, the coverage has been completely updated to reflect the latest ACI 318-11 code.

What the book covers: Laptops For Seniors For Dummies, 5th Edition covers basic information for new laptop owners in the seniors demographic who need a gentle, hand-holding, step-by-step approach to getting started. Series features: This bestselling title uses a larger font and large figures to make the book easy to read. The book assumes no prior knowledge and starts with selecting the right laptop or tablet, shows how the various parts connect together, how to use the keyboard and mouse, finding your way around the new Anniversary version of the Windows 10 operating system, using the touchscreen capabilities, using the Internet for shopping, social networking, emailing friends and family, researching, traveling, staying safe online, using files and folders, using office applications, and so on. General layout: Chapter openers present the tasks covered with associated page numbers to help readers find material fast No extraneous elements such as sidebars and text on parts pages Short introductions with standard headings Whats Inside: Chapters include: Buying A Laptop, Setting Up Your Computer, Getting Around Windows 10, Managing Power, Setting Up Your Display, Getting Help with Vision, Hearing and Dexterity Challenges, Setting Up Printers and Scanners, Connecting with Contana, Working with Software Programs, Working with Files and Folders, Working with Windows Apps, Understanding Internet Basics, Hitting the Road with Your Laptop, Browsing the Web, Staying Safe While Online, Keeping in Touch with Mail, Working in the Cloud, Connecting with Other People, Getting Visual: Using the Video, Photos, and Camera Apps, Playing Music in Windows 10, Working with Networks, Protecting Windows, and Maintaining Windows

This book constitutes the refereed papers of the 2nd International Conference on Contemporary Computing, which was held in Noida (New Delhi), India, in August 2009. The 61 revised full papers presented were carefully reviewed and selected from 213 submissions and focus on topics that are of contemporary interest to computer and computational scientists and engineers. The papers are organized in topical sections on Algorithms, Applications, Bioinformatics, and Systems.

Presents tips and techniques on creating professional lighting effects using the Canon Speedlite system.
