A mathematical introduction to the theory and applications of logic and set theory with an emphasis on writing proofs Highlighting the applications and notations of basic mathematical concepts within the framework of logic and set theory, A First Course in Mathematical Logic and Set Theory introduces how logic is used to prepare and structure proofs and solve more complex problems. The book begins with propositional logic, including two-column proofs and truth table applications, followed by first-order logic, which provides the structure for writing mathematical proofs. Set theory is then introduced and serves as the basis for defining relations, functions, numbers, mathematical induction, ordinals, and cardinals. The book concludes with a primer on basic model theory with applications to abstract algebra. A First Course in Mathematical Logic and Set Theory also includes: Section

exercises designed to show the interactions between topics and reinforce the presented ideas and concepts Numerous examples that illustrate theorems and employ basic concepts such as Euclid's lemma, the Fibonacci sequence, and unique factorization Coverage of important theorems including the well-ordering theorem, completeness theorem, compactness theorem, as well as the theorems of Löwenheim–Skolem, Burali-Forti, Hartogs, Cantor–Schröder–Bernstein, and König An excellent textbook for students studying the foundations of mathematics and mathematical proofs, A First Course in Mathematical Logic and Set Theory is also appropriate for readers preparing for careers in mathematics education or computer science. In addition, the book is ideal for introductory courses on mathematical logic and/or set theory and appropriate for upper-undergraduate transition courses with rigorous mathematical reasoning involving algebra, number theory, or analysis.

The biblical word “heart” has been to some degree a mystery in the body of Christ. Did you know that “Jesus” is in the Bible 983 times, “Father” (God) 979 times, and “heart” 830 times? This clearly signifies that the biblical word “heart” is important to God. Humankind has two types of hearts, a physical heart and a spiritual heart. In the Bible, “heart” refers to our spiritual hearts, not the physical heart. Though most people in the Body of Christ touch their chests when referring to the biblical word “heart”, the spiritual heart is not in the chest. The spiritual heart is the soul (mind, will, emotions). Physically, it is located inside of your head. The purpose of this book is to gain a better understanding of our spiritual hearts. Our ultimate goal is to demystify the biblical word “heart.” This book will provide comprehensive knowledge by God inspired spiritual visual aids and revelation of scripture. As we all know, there is plenty of information on the physical heart but very little information on the spiritual heart. For instance, we know that your physical heart is located inside your chest and pumps blood throughout your body. We also know that exercising and eating right will make your physical heart healthy. Where is your spiritual heart located? What is the purpose of your spiritual heart? What makes your spiritual heart healthy? This book will provide answers to these questions and many other inquiries you may have concerning your “Spiritual Heart”.
