Yakutia can be described as a scientists favorite ldquorefrigeratorrdquo animals that are tens of thousands years old are discovered there ...

Who was found in Russian permafrost

Rivkina The rotifers' longevity record was broken by nematode roundworms ... Monika Ďuríčková (CC BY 2.0)/Sputnik However, the best preserved mummified mammoth is a young female, who ...

Weird ancient creatures found in Russia's permafrost

In 2018, two parasitic worms known as nematodes were revived from ice that was at least 30,000 years old. Understanding the biological mechanisms that drove the rotifers to survive such long ...

Scientists revived a tiny worm-like animal after 24,000 years frozen in Siberian ice. It was still able to eat and reproduce.

The rotifers are just one of many organisms to have survived thousands of years frozen. Nematodes, a type of worm, were revived in 2018 from Siberian permafrost in sediments that were more than 30,000 ...

Meet the rotifer, the microscopic animal that came back to life after 24,000 years frozen in Siberian permafrost

The bdelloid rotifer is known for its ability to withstand ... coming back to life after thousands of years, including a nematode worm, as well as some plants and mosses.

Bdelloid rotifer survives 24,000 years frozen in Siberia

Bdelloid rotifers are multicellular animals so small you need a microscope to see them. Despite their size, they're known for being tough, capable of surviving through drying, freezing, starvation ...

Arctic rotifer lives after 24,000 years in a frozen state

Bdelloid rotifers typically live in watery environments ... Simple worms, called nematodes, were revived from the permafrost from two places in northeastern Siberia, in sediments that were more ...

This animal survived 24,000 years frozen in the Siberian permafrost

Nematodes with a taste for "insect innards" may ... Annually, Americans consume 2.3 pounds of cranberries per person, primarily as juice but also in dried fruit snacks and holiday fare such ...

Microscopic worms to the cranberry rescue

This particular area has been frozen since at least the end of the Pleistocene epoch (2.6 million to 11,700 years ago). The scientists took the frozen rotifers and thawed them gently, at which ...

Russian Scientists Bring 24,000-Year-Old Zombies Back to Life

In terms of multicellular organisms, there has been a report of a 30,000-year-old nematode worm coming back to life, and mosses and some plants also have been regenerated after many thousands of years ...

Arctic micro-animal survives 24,000 years in Siberian permafrost

Rizonema, a biological seed treatment for nematodes and soil-dwelling insects, has undergone multiple regulatory trials in Brazil proving its efficacy on corn and soybeans Pending regulatory approvals ...

Marrone Bio and partner Rizobacter expand strategic alliance to supply Rizonema seed treatment in Brazil

Back in 2018, Russian scientists claimed to have resurrected nematode worms pulled from permafrost deposits dated to at least 32,000 years ago. Previous rotifer recovery records range from between ...

Frozen in Siberian Permafrost for 24,000 Years, Microscopic Animal Comes Back to Life

Scientists dug up the animal known as a bdelloid rotifer from the Alayeza River in the Russian ... celled organisms coming back to life after thousands of years, including a nematode worm, as well as ...

Bdelloid rotifer survives 24,000 years frozen in Siberia

This particular area has been frozen since at least the end of the Pleistocene epoch ... rotifers and other extremophile organisms. The rotifers join a lineup of revived, long-frozen organisms that ...

Russian Scientists Bring 24,000-Year-Old Zombies Back to Life

Scientists dug up the animal known as a bdelloid rotifer from the Alayeza River ... back to life after thousands of years, including a nematode worm, as well as some plants and mosses.

Bdelloid rotifer survives 24,000 years frozen in Siberia

Scientists dug up the animal known as a bdelloid rotifer from the Alayeza River ... back to life after thousands of years, including a nematode worm, as well as some plants and mosses.
