For nearly thirty years, anthropologist and physician Paul Farmer has traveled to some of the most impoverished places on earth to bring comfort and the best possible medical care to the poorest of the poor. Driven by his stated intent to "make human rights substantial," Farmer has treated patients—and worked to address the root causes of their disease—in Haiti, Boston, Peru, Rwanda, and elsewhere in the developing world. In 1987, with several colleagues, he founded Partners In Health to provide a preferential option for the poor in health care. Throughout his career, Farmer has written eloquently and extensively on these efforts. Partner to the Poor collects his writings from 1988 to 2009 on anthropology, epidemiology, health care for the global poor, and international public health policy, providing a broad overview of his work. It illuminates the depth and impact of Farmer's contributions and demonstrates how, over time, this unassuming and dedicated doctor has fundamentally changed the way we think about health, international aid, and social justice. A portion of the proceeds from the sale of this book will be donated to Partners In Health.

"Dr. Paul Farmer is one of the most extraordinary people I've ever known. Partner to the Poor recounts his relentless efforts to eradicate disease, humanize health care, alleviate poverty, and increase opportunity and empowerment in the developing world. It will inspire us all to do our parts."--William J. Clinton "If the world is curious about Paul Farmer, there is a reason for that. No one has done more than he has in bringing modern medicine to the poor across the globe and no one has exceeded him in making us appreciate the diverse barriers that prevent proper medicine from reaching the underdogs of the world. In this wonderful collection of essays, putting together Paul Farmer's writings over more than two decades, we can see how his far-reaching ideas have developed and radically enhanced the understanding of the challenges faced by healthcare in the uneven world in which we live. This is an altogether outstanding book."--Amartya Sen, Nobel Laureate, Economics "To delve into these pages is to join one of the world's great explorers on an epic life journey--to grapple with culture, poverty, disease, health care, ethics, and ultimately our common humanity in the Age of AIDS. Paul Farmer is a pioneer, guide, and inspiration at a time of unprecedented contrasts: between wealth and poverty, power and powerlessness, health and disease, compassion and neglect. His medical expertise, anthropological vision, and unflinching decency have helped to recharge our world with moral purpose."--Jeffrey D. Sachs, Columbia University "Wow! Perfect for teaching. This is more than vintage Farmer. Editor Haun Saussy knows Farmer's work inside out and has assembled and organized 25 classic articles that project the heart of Farmer's brilliant, radical, inspiring, eminently practical and (dare I say) genuinely subversive work."--Philippe Bourgois, author of Righteous Dopefiend "If they gave Nobel Prizes for raising moral awareness, Paul Farmer would have won his a long time ago. For several decades now, his work has posed a

challenge to anyone who dares say that radically improving the health of the world's poor can't be done. This splendid compilation of the best of his work allows us to follow a restless, creative, compassionate mind in action, in and out of prisons and barrios and mud huts and hospital wards, from Haiti to Rwanda to Moscow, never taking 'no' for an answer."--Adam Hochschild, author of *Bury the Chains* "Paul Farmer is a deep scholar of Haitian society, a formidable medical anthropologist, an implacable theorist of structural violence and health as a human right, and an ethicist for whom the place of social justice in medicine and in the world is an existential need. This book is the platform of interconnected intellectual, academic, and practical engagements upon which the amazing, world-transforming life of Farmer stands."--Arthur Kleinman, author of *What Really Matters: Living a Moral Life amidst Uncertainty and Danger* "This collection shows the impressive catalytic effects of original scholarship when combined with action, activism, and a commitment to social justice in health. Paul Farmer and his PIH colleagues have twice changed World Health Organization policies; they continue to have a lasting impact on the global health movement and on the lives of the poor."--Peter Brown, Emory University

This book reflects intersection between the lives, commitments, and strategies of two highly respected figures Dr. Paul Farmer and Fr. Gustavo Gutierrez joined in their option for the poor, their defense of life, and their commitment to liberation. Farmer has credited liberation theology as the inspiration for his effort to do "social justice medicine," while Gutierrez has recognized Farmer's work as particularly compelling example of the option for the poor, and the impact that theology can have outside the church. Draws on their respective writings, major addresses by both at Notre Dame, and a transcript of a dialogue between them.

"Pathologies of Power" uses harrowing stories of life and death to argue that the promotion of social and economic rights of the poor is the most important human rights struggle of our times.

Bill Gates has called Paul Farmer one of the most amazing people he has ever met. CNN medical correspondent Dr. Sanjay Gupta says that "if pure altruism exists in humans, it probably looks a lot like Dr. Paul Farmer." In *Paul Farmer, Servant to the Poor*, Jennie Weiss Block introduces readers to this physician and medical anthropologist of international stature whose Catholic faith has driven him to work untiringly to make a preferential option for the poor in health care. Farmer, with his colleagues at Harvard University and Partners in Health, have been instrumental in bringing the fruits of modern medicine to millions of the poorest people in the world, in places like Haiti, Rwanda, Peru, Russia, Malawi, and West Africa during the recent Ebola crisis. Challenging the conventional wisdom of global health experts, Dr. Farmer has shown it is possible to deliver high-quality medical care on a large scale in settings of great poverty and to build communities around the globe where good health and hope prevail.

Deficiency Syndrome (AIDS) in Haiti. The forces that have helped to determine rates and pattern of spread of Human Immunodeficiency Virus (HIV) are examined, as are social responses to AIDS in rural and urban Haiti, and in parts of North America. History and its calculus of economic and symbolic power also help to explain why residents of a small village in rural Haiti came to understand AIDS in the manner that they did. Drawing on several years of fieldwork, the evolution of a cultural model of AIDS is traced. In a small village in rural Haiti, it was possible to document first the lack of such a model, and then the elaboration over time of a widely shared representation of AIDS. The experience of three villagers who died of complications of AIDS is examined in detail, and the importance of their suffering to the evolution of a cultural model is demonstrated. Epidemiologic and ethnographic studies are prefaced by a geographically broad historical analysis, which suggests the outlines of relations between a powerful center (the United States) and a peripheral client state (Haiti). These relations constitute an important part of a political-economic network termed the "West Atlantic system." The epidemiology of HIV and AIDS in Haiti and elsewhere in the Caribbean is reviewed, and the relation between the degree of involvement in the West Atlantic system and the prevalence of HIV is suggested. It is further suggested that the history of HIV in the Dominican Republic, Jamaica, Trinidad and Tobago, and the Bahamas is similar to that documented here for Haiti.

Argues that illnesses such as AIDS and drug-resistant tuberculosis, malaria, and typhoid target poor communities.

NEW YORK TIMES BESTSELLER AND INSPIRATION FOR THE NETFLIX LIMITED SERIES, HAILED BY ROLLING STONE AS "A GREAT ONE." "A single mother's personal, unflinching look at America's class divide, a description of the tightrope many families walk just to get by, and a reminder of the dignity of all work." -PRESIDENT BARACK OBAMA, Obama's Summer Reading List At 28, Stephanie Land's dreams of attending a university and becoming a writer quickly dissolved when a summer fling turned into an unplanned pregnancy. Before long, she found herself a single mother, scraping by as a housekeeper to make ends meet. *Maid* is an emotionally raw, masterful account of Stephanie's years spent in service to upper middle class America as a "nameless ghost" who quietly shared in her clients' triumphs, tragedies, and deepest secrets. Driven to carve out a better life for her family, she cleaned by day and took online classes by night, writing relentlessly as she worked toward earning a college degree. She wrote of the true stories that weren't being told: of living on food stamps and WIC coupons, of government programs that barely provided housing, of aloof government employees who shamed her for receiving what little assistance she did. Above all else, she wrote about pursuing the myth of the American Dream from the poverty line, all the while slashing through deep-rooted stigmas of the working poor. *Maid* is Stephanie's story, but it's not hers alone. It is an inspiring testament to the courage, determination, and ultimate strength of the human spirit.

thirty years, reveals the secrets behind the firm's continued success through many life-threatening changes. Disgraced and nearly destroyed in 1929, Goldman Sachs limped along as a break-even operation through the Depression and WWII. But with only one special service and one improbable banker, it began the stage-by-stage rise that took the firm to global leadership, even in the face of the world-wide credit crisis.
