"It's all here, from the two-finger sang to 'reefing' (a method that utilizes the mark's pocket lining)". -- Reflex If you wonder how someone can get inside your pockets without your knowing, then get inside this book. You'll learn all the techniques of the pickpocket: how they guess which pocket holds the loot, the grab and run, the finesse lift, cutting the pockets, how they use accomplices, how they can steal a watch right off the wrist. Learn how the pros get into your clothes, and what you can do to protect yourself.

Concurrent Engineering (CE) is a systematic approach to the integrated and concurrent design of products and related processes,

including aspects as diverse as manufacture and support. It is only now being carefully applied to the construction sector and offers considerable potential for increasing efficiency and effectiveness. It enables developers to consider all elements of a building or structure's life cycle from the conception stage right through to disposal, and to include issues of quality, cost, schedule, and user requirements. Drawing together papers that reflect various research efforts on the implementation of CE in construction projects, Concurrent Engineering in Construction presents construction professionals and academics with the key issues and technologies important for CE's adoption, starting with fundamental concepts and then going on to the role of organisational enablers and advanced information and communication technologies, then providing conclusions and suggestions of future directions.
