SeaChange International, Inc. (SEAC)

Sea change or sea-change is an English idiomatic expression which denotes a substantial change in perspective, especially one which affects a group or society at large, on a particular issue. It is similar in usage and meaning to a paradigm shift, and may be viewed as a change to a society or community's zeitgeist, with regard to a specific issue.

Sea change (idiom) - Wikipedia

What's causing sea levels to change? Climate change, mostly.Rising temperatures warm the air and the water. As water warms, it expands. The warm air and water also melts ice sheets.

How will sea levels change with climate change? | Live Science

SeaChange is an Australian television program that ran from 1998 to 2000 on the ABC and in 2019 on the Nine Network. It was created by Andrew Knight and Deborah Cox and starred Sigrid Thornton, David Wenham, William McInnes, John Howard, Tom Long, and Kerry Armstrong. The director was Michael Carson.

SeaChange - Wikipedia

Sea Change: Primal Joy and the Art of Underwater Tracking. Craig Foster and Ross Frylinck have spent years exploring the seaforest together. This is the story of what they found in the wild, and how it has transformed their lives.

Sea Change Project

Sea Change offers in-office and remote support, as well as virtual storage and cloud computing products and training. Unlike companies that only offer hardware repair or cloud computing services, Sea Change meets all IT needs, including virtualization, security, and voice solutions. Sea Change is a Microsoft Partner and a Cloud Champion.

In 2012, at the request of the U.S. Climate Change Science Program, NOAA scientists conducted a review of the research on global sea level rise projections. Their experts concluded that even with lowest possible greenhouse gas emission pathways, global mean sea level would rise at least 8 inches (0.2 meters) above 1992 levels by 2100.

SEA CHANGE FOUNDATION Founded in 2006 by Nat Simons and Laura Baxter-Simons as a private family foundation, Sea Change Foundation is dedicated to achieving meaningful social impact through strategic philanthropy that addresses the most pressing problems facing the world today.

Lifetime Original Movie! New York Times bestselling author Aimee Friedman is back, with her signature combination of warmth and humor. And with this book, she adds a touch of fantasy . . . Sixteen-year-old Miranda Merchant is great at science . . . and not so great with boys. After major drama with her boyfriend and (now ex) best friend, she's happy to spend the summer on small, mysterious Selkie Island, helping her mother sort out her late grandmother's estate. There, Miranda finds new friends and an island with a mysterious, mystical history, presenting her with facts her logical, scientific mind can't make sense of. She also meets Leo, who challenges everything she thought she knew about boys, friendship . . . and reality.

A lonely woman with a life-long feeling of not quite belonging elopes with a child psychologist she met at a conference and discovers how difficult it is to actually escape your past. Original. 150,000 first printing.

Sea Change is Peter Nichols' first book, a biographical account of his own dramatic adventure. When his marriage ended, Nichols had to sell the only thing he and his wife owned - their boat. With only his sextant, his instincts as a seasoned sailor and his memories of a floundering marriage, he sets out from England to sail to America to sell his beloved boat, Toad. Halfway across the Atlantic, Toad springs a leak. As the sea floods in faster, Nichols tries everything to stay afloat, desperately pumping the water out by hand. He loses the battle after three days and is forced to abandon Toad. This is more than a sea-tale. It is the painful story of his marriage, his boat and himself.

When the body of a divorced Florida heiress washes ashore in Massachusetts, police chief Jesse Stone learns of the woman's past appearances in an erotic video and finds it suspicious that the victim's family seems unaffected by her death.

Lilly forbids Octavius, a kraken who offers friendship and a haven from her conflict-riddled family life, from harming humans and strikes a painful bargain with a witch when Octavius is captured by traders and sold to a circus.

A thriller that draws on the science of oceanography explores what could happen when science forces nature to work against itself.

An international thriller set in eighteenth-century Europe by the “master of the clever twist” and acclaimed author of the James Maxted series (The Sunday Telegraph). It’s January 1721, and London is still reeling from the recession caused by the greatest financial scandal of the age: the collapse of the South Sea Bubble. William Spandrel, a penniless mapmaker, is offered a rare chance to clear his debts. But Sir Theodore Janssen, a director of the South Sea Company, has one condition: Spandrel must secretly convey an important package to Amsterdam. Shortly after delivering the parcel, its recipient is killed. Then, barely surviving an attempt on his own life, Spandrel discovers that he is the prime suspect in the murder—and a pawn in a dangerous game. With British government agents and other foes on his trail, Spandrel’s only chance of survival is to recover the package and place its contents in the hands of the right person. But determining who that is will be a deadly challenge . . . “[A] picaresque tale of high adventure and low intrigue . . . The historical period is vividly conjured up and the narrative flows effortlessly . . . Engrossing storytelling of a very high order.” —The Observer “Hugely enjoyable . . . Totally entertaining.” —Time Out

Elliot's octopian shifter side is at odds with the proper gentleman he knows he really is. He can't deny that he needs Declan's rock-like stability to get through the shifts at low tide during the supermoon. Elliot is the water flowing along the riverbed, the waves crashing against the bluffs. Declan is the rocky gorge that holds him and contains him, the cliffs standing firm, keeping him where he belongs. Declan's love anchors Elliot while their passion permits him to shift back to human from octopian. But their nights together take an increasing toll on Declan and if they can't find answers, Elliot must give Declan up for his own good. Return to the sexy, tentacle-filled world of the octopians, where passion sucks Elliot and Declan into a whirlpool of love and desire with consequences that ripple far beyond their relationship. Dive into SEA CHANGE today.

Internationally renowned as the ambassador-at-large to the world's oceans, Sylvia Earle is an extraordinary woman--the former chief scientist of the National Oceanic and Atmospheric Administration, a distinguished marine biologist, a veteran of more than 6,000 hours underwater, the founder of an ocean engineering firm, and an eloquent advocate for marine conservation. Sea Change is at once the gripping adventure story of Earle's three decades of undersea exploration, an insider's introduction to the dynamic field of marine biology, and an urgent plea for the preservation of the world's fragile and rapidly deteriorating ocean ecosystems. Earle takes us along on journeys to places of unimaginable beauty and unutterable destruction. She conjures up the exhilaration of swimming with humpback whales off the coast of Maui; she makes us comprehend the true environmental tragedy of the massive oil spills in Prince William Sound and the Persian Gulf; and she leads us out into Australia's Great Barrier Reef, the epitome of ocean wilderness but also the final resting place for tons of waste that drift in from thousands of miles away. This brilliant, thought-provoking, superbly readable book will inspire a new reverence for the majesty of the world's oceans even as it opens our eyes to the intricate interdependence of all life-forms.
