products, including SolarWinds NTA. It provides centralized administration, access control, and alerting and reporting. The Orion Web Console is the web interface used for navigating through the NetFlow Summary page, managing SolarWinds NTA settings, or common Orion features like alerts and reports.

How SolarWinds NTA works  
SolarWinds High Availability (HA) provides failover protection for your Orion server and additional polling engines to reduce data loss. If your primary server fails, the HA feature allows your secondary server
