~~Because this answer file is cached, when you run the Sysprep command, the system applies settings in the cached answer file. If you use the settings in a different answer file, you can specify a separate Unattend.xml file by using the Sysprep /unattend:<file_name> option. For more information, see Sysprep Command-Line Options. For more information about how to use an implicit answer-file search, seeWindows Setup Automation Overview.~~

~~Use Answer Files with Sysprep | Microsoft Docs~~

~~Sysprep processes any settings in the oobeSystem configuration pass in an answer file before OOBE starts. /mode:vm. Generalizes a Virtual Hard Disk (VHD) so that you can deploy the VHD as a VHD on the same Virtual Machine (VM) or hypervisor. After the VM restarts, the VM can boot to OOBE. For example: Sysprep /generalize /oobe /mode:vm~~

~~Sysprep Command-Line Options | Microsoft Docs~~

~~You can either use Sysprep by itself or Sysprep with an unattend answer file to generalize your image and make it ready for deployment. Generalize a Windows installation When you generalize a Windows image, Windows Setup processes settings in the generalize configuration pass.~~

~~Sysprep (Generalize) a Windows installation | Microsoft Docs~~

~~One of the missing options of sysprep in my opinion is to just generalize an installation. Alternatives are to use third-party utilities to reset the computers' SID, but since it's not an official solution, I will show you how to do it the 'official way' by using an answer file.~~

~~Windows Sysprep Image Without OOBE With User~~

~~You can use an answer file together with the System Preparation (Sysprep) tool. It allows configuring unattended Windows Setup settings. This step is optional (used to automatically specify various parameters that must be configured when the image is at first run). You can skip this step, and go straight to the step of capturing a Windows image.~~

~~Sysprep Windows 10 Machine: Step by Step Guide - TheITBros~~

~~Windows System Image Manager is the tool used to create an unattended Windows Setup answer file. Windows AFG, however, does not need the Windows Automated Installation Kit or Windows Assessment and Deployment Kit to be installed or downloaded. Windows AFG provides a simple web based form that gives the user options to configure the desired answer file; which is all based off Windows SIM.~~

~~Windows Answer File Generator~~

~~Copy the answer file into the image into the \Windows\Panther folder, and name it unattend.xml. The Panther folder is one of the folders where Windows searches for an answer file. Create the folder if it doesn't exist. If there's an existing answer file, replace it or use Windows System Image Manager to edit/combine settings if necessary.~~

~~Answer files (unattend.xml) | Microsoft Docs~~

~~One of the missing options of sysprep in my opinion is to just generalize an installation. Alternatives are to use third-party utilities to reset the computers' SID, but since it's not an official solution, I will show you how to do it the 'official way' by using an answer file. The only two options available in the sysprep utility are:~~

~~Sysprep generalize Windows image without OOBE~~

~~Right click DiskConfiguration under Microsoft-Windows-Setup in the Answer File pane, then select Insert New Disk: Next, select the new disk in the Answer File pane, and edit its properties. DiskID tells Windows Setup which disk to use to install Windows, where DiskID 0 is the primary hard disk (DiskID 1 = second HDD, and so on).~~

~~Windows 10 Unattended install media - Part 2: Answer file ...~~

~~An answer file is a set of instructions in an XML file. When sysprep is run, it reads these instructions, what changes it should make to the Windows image. At first, we need to create a catalog file. For that, we need the install.wim file from a Windows install disk or ISO file.~~

~~Sysprep Windows 10 Machine: Step by Step Guide - Hans van ...~~

~~Simple Sysprep Answer File. GitHub Gist: instantly share code, notes, and snippets.~~

~~Simple Sysprep Answer File - GitHub~~

~~To do this, in your answer file, specify the PersistAllDeviceInstalls setting in the Microsoft-Windows-PnP Sysprep component. The default value is false. If you set the setting to true, the Plug and Play devices remain on the computer during the generalize configuration pass.~~

~~Sysprep Process Overview | Microsoft Docs~~

~~Click on the Shell-Setup in the answer file section and fill in the "ProductKey" with the default KMS key found here <http://technet.microsoft.com/en-us/library/Ef793406.aspx>. These product keys will not activate via Microsoft (retail), instead they are dummy keys for a Key Management Server to activate.~~

~~How To Make An Unattend.xml Sysprep File - Behack~~

~~Select the new LocalAccount item in the Answer File pane, add an account description (optional), a DisplayName as you want it to appear in the sign-in screen and Settings, plus a group and account profile name (how, for instance, the user folder will be named in the C:\Users folder).~~

~~Windows 10 Unattended install media - Part 3: Answer file ...~~

~~The answer file for Setup, typically called Unattend.xml, is used along with the System Preparation tool (Sysprep) to prepare an installation of Windows operating system for duplication or imaging by capturing a customized Windows master image that we can reuse throughout our organization.~~

~~Edit the Answer File - Unattend.xml - Alex Computer Bubble~~

~~There's a utility called setupmgr.exe in the archive which is what we can use to build the majority of the answer file for us. Most of it is self explanatory, I've included screenshots and explanations of steps that require some planning/thought. The first question of note is what type of answer file to build.~~
