This title provides a theoretically and methodologically new and distinct approach to gender through the frameworks of biopolitics and genealogy, theorising it as a historically specific apparatus of biopower. Through the use of a diverse mix of historical and contemporary documents, the book explores how the problematisation of intersex infant genitalia in 1950s psychiatry propelled the emergence of the gender apparatus in order to socialise sexed individuals into the ideal productive and reproductive subjects of White, middle-class postwar America.

The Latin language has been the one constant in the cultural history of the West for more than two millennia. It has been the foundation of our education, and has defined the way in which we express our thoughts, our faith, and our knowledge of how the world functions. Indeed, the language has proved far more enduring than its empire in Rome, its use echoing on in the law codes of half the world, in the terminologies of modern science, and until forty years ago, in the liturgy of the Catholic Church. It is the unseen substance that makes us members of the Western world. In his erudite and entertaining "biography," Nicholas Ostler shows how and why (against the odds, through conquest from within and without) Latin survived and thrived even as its creators and other languages failed. Originally the dialect of Rome and its surrounds, Latin supplanted its neighbors to become, by conquest and settlement, the language of all Italy, and then of Western Europe and North Africa. Its cultural creep toward Greek in the East led it to copy and then ally with it in an unprecedented, but invincible combination: Greek theory and Roman practice, delivered through Latin, became the foundation of Western civilization. Christianity, a latecomer, then joined the alliance, and became vital to Latin's survival when the empire collapsed. Spoken Latin re-emerged as a host of new languages, from Portuguese and Spanish in the west to Romanian in the east. But a knowledge of Latin lived on as the common code of European thought, and inspired the founders of Europe's New World in the Americas. E pluribus unum. Illuminating the extravaganza of its past, Nicholas Ostler makes clear that, in a thousand echoes, Latin lives on, ad infinitum.

"Having faith in the Lord is not something that involves solely our intelligence, the area of intellectual knowledge; rather, it is a change that involves our life, our whole self: feelings, heart, intelligence, will, corporeity, emotions, and human relationships. With faith everything truly changes." So Pope Benedict XVI introduced his catecheses for the Year of Faith, a series of sixteen talks given at his weekly audience from October 2012 to the end of his papacy in February 2013. These talks explore how and why faith is relevant in the contemporary world. How can we come to certainty about things that cannot be calculated or scientifically confirmed? What does God's revelation mean for our daily lives? How can the hunger of the human heart be fulfilled? Offering the guidance of biblical exegesis, pastoral exhortation, and brotherly encouragement, Pope Benedict seeks to answer these questions and many others.

Breakthrough Relief of Bacterial Vaginosis and Vaginal Yeast Infection.

Covering all three of the new system administration exams required by the recently restructured Lotus certification program, this guide is marketed toward the many professionals who work daily with the Lotus Notes and Domino products and are familiar with their intricacies. The "Fast Track" series provides the best way for more-advanced candidates to learn how to pass the highly anticipated Lotus certification exam upgrades.

Ambiguous Spaces, the newest installment in the Pamphlet Architecture series and a return to Pamphlet's own progressive roots, features the architectural fictions "The Pregnant Island" and "Nuclear Breeding." These two projects develop alternative urban concepts that address the challenges presented by the specific

situations and social dynamics described in controversial locations such as the Brazilian Tucuruí Dam, the Three Gorges Dam in China, and former English nuclear test sites. Using narrative techniques, fictional programs, ambiguous spaces, and building devices, *Ambiguous Spaces* explores people, communities, and even entire cities oppressed by a lack of freedom.

Service and maintenance procedures for walk behind mowers.

A talented designer explains how to create a wide variety of unusual and innovative hand-printed fabrics, furnishings, accessories, and paper crafts by using stencils, master stamps, and screen printing, using step-by-step instructions to teach crafters the fundamentals of hand printing and offering an array of ingenious projects, from screen-printed bed linens to stationery.
