A vibrant and sturdy word book featuring fruits and vegetables from around the world from Caldecott Honor-winning author-illustrator Lois Ehlert featuring upper- and lowercase letters for preschoolers just learning language. Apple to Zucchini, come take a look. Start eating your way through this alphabet book. Each turn of the page reveals a mouth-watering arrangement of foods: Indian corn, jalapeno, jicama, kumquat, kiwifruit and kohlrabi. Lois Ehlert's lively watercolors paired with bold easy-to-read type make for a highly appealing and accessible book for parents and children to devour. At the end of the book, Ehlert provides a detailed glossary that includes pronunciation, botanical information, the origin and history of the particular plant and occasional mythological references, with a small watercolor picture to remind the reader of what the plant looks like.

"A comprehensive and entertaining historical and botanical review, providing an enjoyable and cognitive read."—Nature The foods we eat have a deep and often surprising past. From almonds and apples to tea and rice, many foods that we consume today have histories that can be traced out of prehistoric Central Asia along the tracks of the Silk Road to kitchens in Europe, America, China, and elsewhere in East Asia. The exchange of goods, ideas, cultural practices, and genes along these ancient routes extends back five thousand years, and organized trade along the Silk Road dates to at least Han Dynasty China in the second century BC. Balancing a broad array of archaeological, botanical, and historical evidence, *Fruit from the Sands* presents the fascinating story of the origins and spread of agriculture across Inner Asia and into Europe and East Asia. Through the preserved remains of plants found in archaeological sites, Robert N. Spengler III identifies the regions where our most familiar crops were domesticated and follows their routes as people carried them around the world. With vivid examples, *Fruit from the Sands* explores how the foods we eat have shaped the course of human history and transformed cuisines all over the globe.

Featuring a special section on how children can make a tree identification book of their own, this title is a bright and colorful introduction to trees, leaves, and their inner workings in nature. Full color.

Depicts and discusses edible parts of plants, challenging the reader to identify them from the photographs.

Winner of the 2014 IACP Cookbook Award in the category of "Food Matters." The next stage in the food revolution--a radical way to select fruits and vegetables and reclaim the flavor and nutrients we've lost. Ever since farmers first planted seeds 10,000 years ago, humans have been destroying the nutritional value of their fruits and vegetables. Unwittingly, we've been selecting plants that are high in starch and sugar and low in vitamins, minerals, fiber, and antioxidants for more than 400 generations. *EATING ON THE WILD SIDE* reveals the solution--choosing modern varieties that approach the nutritional content of wild plants but that also please the modern palate. Jo Robinson explains that many of these newly identified varieties can be found in supermarkets and farmer's market, and introduces simple, scientifically proven methods of preparation that enhance their flavor and nutrition. Based on years of scientific research and filled with food history and practical advice, *EATING ON THE WILD SIDE* will forever change the way we think about food.

"...an attractive, informative production." - School Library Journal

Spring is in the air! Bear, Bird, and Mouse are all excited that winter snows are melting away, but their friend Rabbit is not. There are too many things about winter that Rabbit adores, and spring just seems to spell trouble. His friends offer an abundance of reasons to love spring and the changing seasons, but will Rabbit listen? Daniel Kirk has written a lively and humorous tale with the gentle message that change can be fun.
