New York Times Bestseller A New York Times Best Cookbook of Fall 2018 |An indispensable manual for home cooks and pro chefs. |Wired At Noma|four times named the world's best restaurant|every dish includes some form of fermentation, whether it's a bright hit of vinegar, a deeply savory miso, an electrifying drop of garum, or the sweet intensity of black garlic. Fermentation is one of the foundations behind Noma's extraordinary flavor profiles. Now René Redzepi, chef and co-owner of Noma, and David Zilber, the chef who runs the restaurant's acclaimed fermentation lab, share never-before-revealed techniques to creating Noma's extensive pantry of ferments. And they do so with a book conceived specifically to share their knowledge and techniques with home cooks. With more than 500 step-by-step photographs and illustrations, and with every recipe approachably written and meticulously tested, The Noma Guide to Fermentation takes readers far beyond the typical kimchi and sauerkraut to include koji, kombuchas, shoyus, misos, lacto-ferments, vinegars, garums, and black fruits and vegetables. And|perhaps even more important|it shows how to use these game-changing pantry ingredients in more than 100 original recipes. Fermentation is already building as the most significant new direction in food (and health). With The Noma Guide to Fermentation, it's about to be taken to a whole new level.

The Book That Started the Fermentation Revolution Sandor Ellix Katz, winner of a James Beard Award and New York Times bestselling author, whom Michael Pollan calls the "Johnny Appleseed of Fermentation" returns to the iconic book that started it all, but with a fresh perspective, renewed enthusiasm, and expanded wisdom from his travels around the world. This self-described fermentation revivalist is perhaps best known simply as Sandorkraut, which describes his joyful and demystifying approach to making and eating fermented foods, the health benefits of which have helped launch a nutrition-based food revolution. Since its publication in 2003, and aided by Katz's engaging and fervent workshop presentations, Wild Fermentation has inspired people to turn their kitchens into food labs: fermenting vegetables into sauerkraut, milk into cheese or yogurt, grains into sourdough bread, and much more. In turn, they've traded batches, shared recipes, and joined thousands of others on a journey of creating healthy food for themselves, their families, and their communities. Katz's work earned him the Craig Clairborne lifetime achievement award from the Southern Foodways Alliance, and has been called "one of the unlikely rock stars of the American food scene" by The New York Times. This updated and revised edition, now with full color photos throughout, is sure to introduce a whole new generation to the flavors and health benefits of fermented foods. It features many brand-new recipes—including Strawberry Kvass, African Sorghum Beer, and Infinite Buckwheat Bread—and updates and refines original recipes reflecting the author's ever-deepening knowledge of global food traditions that has influenced four-star chefs and home cooks alike. For Katz, his gateway to fermentation was sauerkraut. So open this book to find yours, and start a little food revolution right in your own kitchen. Praise for Sandor Ellix Katz and his books: "The Art of Fermentation is an extraordinary book, and an impressive work of passion and scholarship."--Deborah Madison, author of Local Flavors "Sandor Katz has proven himself to be the king of fermentation."--Sally Fallon Morell, President, The Weston A. Price Foundation "Sandor Katz has already awakened more people to the diversity and deliciousness of fermented foods than any other single person has over the last century."--Gary Paul Nabhan, author of Growing Food in a Hotter, Drier Land "The fermenting bible." -- Newsweek "In a country almost clinically obsessed with sterilization Katz reminds us of the forgotten benefits of living in harmony with our microbial relatives." -- Grist

Shaya's memoir begins in Israel and wends its way from the U.S.A. to Italy, back to Israel, and comes together in the American South, in the heart of New Orleans. Shaya tells of how food saved his life and how, through a circuitous path of (cooking) twists and (life-affirming) turns his celebrated cuisine-- food of his native Israel with a creole New Orleans kick-- came to be.

A guide to the art and science of fermented foods provides recipes that progress from simple condiments to more advanced techniques, offering insight into the history and health benefits of fermentation.

" "Noma is the most important cookbook of the year." | The Wall Street Journal René Redzepi has been widely credited with re‐inventing Nordic cuisine. His Copenhagen restaurant, Noma, was recognized as the #1 best in the world by the San Pellegrino World's 50 Best Restaurant awards in April 2010 after receiving the "Chef's Choice" award in 2009. Redzepi operates at the cutting edge of gourmet cuisine, combining an unrelenting creativity and a remarkable level of craftsmanship with an inimitable and innate knowledge of the produce of his Nordic terroir. At Noma, which Redzepi created from a derelict eighteenth‐century warehouse in 2003 after previously working at both elBulli and The French Laundry, diners are served exquisite concoctions, such as Newly‐Ploughed Potato Field or The Snowman from Jukkasjarvi, all painstakingly constructed to express their amazing array of Nordic ingredients. His search for ingredients involves foraging amongst local fields for wild produce, sourcing horse‐mussels from the Faroe Islands and the purest possible water from Greenland. Redzepi has heightened the culinary philosophy of seasonally and regionally sourced sustainable ingredients to an unprecedented level, and in doing so has created an utterly delicious cuisine. At the age of 37, Redzepi is one of the most influential chefs in the world. Noma: Time and Place in Nordic Cuisine offers an exclusive insight into the food, philosophy and creativity of René Redzepi. It reveals the first behind the scenes look at the restaurant, Noma, and features over 90 recipes as well as excerpts from Redzepi's diary from the period leading up to the opening of the restaurant and texts on some the most enigmatic of Noma's suppliers. The book includes 200 new specially commissioned color photographs of the dishes, unique local ingredients and landscapes from across the Nordic region. It also includes a foreword by the artist Olafur Eliasson. "

Winner of the 2013 James Beard Foundation Book Award for Reference and Scholarship, and a New York Times bestseller, The Art of Fermentation is the most comprehensive guide to do-it-yourself home fermentation ever published. Sandor Katz presents the concepts and processes behind fermentation in ways that are simple enough to guide a reader through their first experience making sauerkraut or yogurt, and in-depth enough to provide greater understanding and insight for experienced practitioners. While Katz expertly contextualizes fermentation in terms of biological and cultural evolution, health and nutrition, and even economics, this is primarily a compendium of practical information—how the processes work; parameters for safety; techniques for effective preservation; troubleshooting; and more. With two-color illustrations and extended resources, this book provides essential wisdom for cooks, homesteaders, farmers, gleaners, foragers, and food lovers of any kind who want to develop a deeper understanding and appreciation for arguably the oldest form of food preservation, and part of the roots of culture itself. Readers will find detailed information on fermenting vegetables; sugars into alcohol (meads, wines, and ciders); sour tonic beverages; milk; grains and starchy tubers; beers (and other grain-based alcoholic beverages); beans; seeds; nuts; fish; meat; and eggs, as well as growing mold cultures, using fermentation in agriculture, art, and energy production, and considerations for commercial enterprises. Sandor Katz has introduced what will undoubtedly remain a classic in food literature, and is the first—and only--of its kind.

Bestselling author Sandor Katz|an |unlikely rock star of the American food scene| (New York Times)|delivers a mesmerizing treatise on the meaning of fermentation alongside his awe-inspiring photography of this transformative process, teaching us with words and images about ourselves, our culture, and being human. In 2012, Sandor Ellix Katz published The Art of Fermentation, which quickly became the bible for foodies around the world, a runaway bestseller, and a James Beard Book Award winner. Since then his work has gone on to inspire countless professionals and home cooks worldwide, bringing fermentation into the mainstream. In Fermentation as Metaphor, stemming from his personal obsession with all things fermented, Katz meditates on his art and work, drawing connections between microbial communities and aspects of human culture: politics, religion, social and cultural movements, art, music, sexuality, identity, and even our individual thoughts and feelings. He informs his arguments with his vast knowledge of the fermentation process, which he describes as a slow, gentle, steady, yet unstoppable force for change. Throughout this truly one-of-a-kind book, Katz showcases fifty mesmerizing, original images of otherworldly beings from an unseen universe|images of fermented foods and beverages that he has photographed using both a stereoscope and electron microscope|exalting microbial life from the level of |germs| to that of high art. When you see the raw beauty and complexity of microbial structures, Katz says, they will take you |far from absolute boundaries and rigid categories. They force us to reconceptualize. They make us ferment. | Fermentation as Metaphor broadens and redefines our relationship with food and fermentation. It's the perfect gift for serious foodies, fans of fermentation, and non-fiction readers alike.
