VRIL follows a young Englishman (the narrator), who accidentally finds his way into a subterranean world occupied by beings called the Vril-ya. He discovers that the Vril-ya are descendants of an antediluvian civilisation who live in networks of subterranean caverns, where they make use of an "all-permeating fluid" called "Vril", a source of tremendous power.

Vril, the Power of the Coming Race is an 1871 novel by Edward Bulwer-Lytton. Its readers have been those who believed that its account of a subterranean master race and the energy-form called "Vril" was real, to the degree that theosophists, including Helena Blavatsky, William Scott-Elliott, and Rudolf Steiner, accepted the book as being somewhat based on occult truth. A book, *The Morning of the Magicians* (1960), suggested that a secret Vril Society existed in pre-Nazi Berlin. Despite no solid evidence that the society existed.

"Vril; the Power of the Coming Race" comes from one of the stranger characters of the 19th century. Bulwer-Lytton's works then would proceed to inform, to varying degrees, many of the occult works and figures of the subsequent five decades, from Blavatsky on through to the now modern era with its UFOs and Antarctic expeditions. As a fictional work, this text is interesting- it is when the work is taken as a veiled reference to reality that we get two entirely different meanings- a symbolic work as Plato's Atlantis writings, on the topic of philosophy, or a reference to actual events as it is (and was) taken by some. Its early science fiction, then-standard fantasy content continues its readability to this very day.

This early science fiction novel offers a fascinating vision of a shadowy underworld populated by strange and beautiful creatures who closely resemble the angels described in Christian lore. These beings, known as Vril-ya, live underground, but are planning soon to claim the surface of the earth as their own -- destroying humankind in the process.

A legendary book, which was the starting point for the genre of science fiction, Theosophy, the New Age, The Force, and modern day conspiracy theories. It's tale of a subterranean Master Race, able to control a mysterious energy force, called the Vril. It inspired the Vril Society in Germany and beyond, and was believe by many to be very thinly disguised reality. You owe it to yourself to peruse this highly entertaining and engaging seminal work, and see where many of our widely held beliefs today were spawned!

The Coming Race - Vril, the Power of the Coming Race by Edward Bulwer. *Vril, the Power of the Coming Race* is an 1871 novel by Edward Bulwer-Lytton, originally printed as *The Coming Race*. Among its readers have been those who have believed that its account of a superior subterranean master race and the energy-form called "Vril" is accurate, to the extent that some theosophists, notably Helena Blavatsky, William Scott-Elliott, and Rudolf Steiner, accepted the book as being (at least in part) based on occult truth. A popular book, *The Morning of the Magicians* (1960) suggested that a secret Vril Society existed in pre-Nazi Berlin. However, there is no historical evidence for the existence of such a society. *The Coming Race* was originally published anonymously in late 1871 but Bulwer-Lytton was known to be the author. Samuel Butler's *Erewhon* was also published anonymously, in March 1872, and Butler suspected that its initial success was due to it being taken by many as a sequel by Bulwer-Lytton to *The Coming Race*. When it was revealed in the 25 May 1872 edition of the *Athenaeum* that Butler was the author, sales dropped by 90 percent because he was unknown at the time. The novel centres on a young, independently wealthy traveller (the narrator), who accidentally finds his way into a subterranean world occupied by beings who seem to resemble angels and call themselves Vril-ya. The hero soon discovers that the Vril-ya are descendants of an antediluvian civilisation who live in networks of subterranean caverns linked by tunnels. It is a technologically supported Utopia, chief among their tools being the "all-permeating fluid" called "Vril", a latent source of energy which its spiritually elevated hosts are able to master through training of their will, to a degree which depends upon their hereditary constitution, giving them access to an extraordinary force that can be controlled at will. The powers of the will include the ability to heal, change, and destroy beings and things; the destructive powers in particular are awesomely powerful, allowing a few young Vril-ya children to wipe out entire cities if necessary. It is also suggested that the Vril-ya are fully telepathic. The narrator states that in time, the Vril-ya will run out of habitable spaces underground and start claiming the surface of the Earth, destroying mankind in the process if necessary.

From Jules Verne's *Journey to the Center of the Earth* to Rudy Rucker's *The Hollow Earth*, subterranean worlds have been a source of both fascination and fear for the literary imagination, and *The Coming Race* is no exception. An evolutionary fantasy first published in 1871, the story draws upon ideas of Darwinism to describe a near-future world characterized by female dominance, physical perfection, and vast technological progress. The novel was extremely popular in its time and is now considered seminal science fiction text by contemporary scholars.
