At present, the recycling of polystyrene (or EPS foam) basically follows the following process:

Segregation – EPS foam products are separated from other wastes and then sorted.

Compaction – The segregated EPS foam products are fed to a compactor in order to reduce its volume.

Polystyrene packaging.

Polystyrene is a type of plastic which is not commonly recycled.

Most people readily recognise expanded polystyrene which is sometimes used for take-away food containers and to package white goods like microwaves.

Download Ebook Waste

Expanded polystyrene should be placed in the waste bin. Polystyrene is also sometimes used for other food packaging like multi-pack yoghurts.
