the outcome of  
an observation  
made in this  
laboratory in  
connection with  
an entirely  
different line  
of work. A  
Japanese, Ota,  
was working on  
the condition of  
certain double  
salts in the  
presence of

# Get Free What Is Concentrated Solution

water, to ascertain whether they existed as such, to any appreciable extent, or were broken down by the solvent into the constituent molecules. As soon as he began to work with concentrated

# Get Free What Is Concentrated

Solutions, he found that these solutions froze abnormally low; the molecular lowering passing through a well-defined minimum with change in concentration. Similar results were obtained a little later by Dr. Knight, also

# Get Free What Is Concentrated

Solution  
working in this  
laboratory.

There was  
nothing in the  
theory of  
solutions then  
in vogue to  
account for such  
results - the  
molecular  
lowering should  
decrease  
continually from  
the most. Dilute

# Get Free What Is Concentrated

**Solution** to the most concentrated solution. This was obviously a remarkable phenomenon, especially if it should be shown to manifest itself in the case of any large number of substances.
